

Dinex® High Heat Reusable Trays

Hot, Consistent Retherm Meal Delivery

Ensure every meal you serve is hot and fresh when served on high heat reusable trays! These high-quality trays are designed for use in Meals On Command and Thermal Aire retherm systems. Each tray offers a sturdy design with a raised edge and a flat channel in the center which slides into the center panel of retherm units, keeping the cold side cold and the hot side hot.

Benefits

Double-Sided Design

Features a channel in the middle and supports double-sided cold and hot retherm applications

High Heat Application

Suitable for high temperatures

Retherm Use

Designed for use in Thermal Aire III and Meals On Command II retherm systems

Raised Edge

Provides a subtle barrier to keep traytop items contained

DINEX

Built to last during high-traffic food operations

Temperature safe up to 300°F

Trays stack together to conserve space

Durable material resists breaking and scratching

Dishwasher Safe

Ideal for use with MOC and Thermal Air carts
