**Bugambilia can help you differentiate your presentation from all others with our unique buffet ware and serving pieces. Our shapes, colors and sizes are well suited for any menu item and will create an attractive display for your guest's dining pleasure.**

For more than 30 years, our foundry in Mexico has been producing unique, solid sand-cast aluminum products that are handcrafted, manufactured and shipped all over the world. Our products are specially designed for commercial use - so you can be sure our ware can withstand a busy hospitality environment.

#### **Bugambilia Benefits & Features**

- wide range of shapes, sizes and colors for various menu presentations
- 22 colors which will maintain their luster even after continuous use
- patent pending technology of resin-coating baked into aluminum body which prevents bubbling, lifting or peeling
- can tolerate temperatures from -20°F (-4°C) to 200°F (93°C)
- cast aluminum body is a great conductor of temperature, allowing foods to maintain proper serving temperatures for extended periods of time
- can be placed in freezer, refrigerator or warming oven prior to service (not suitable for food preparation or food storage)
- can be placed directly on ice, on cold tables and in deli cases
- heat lamps can be used
- commercial dishwasher safe and resistant to scratching, chipping, peeling and tarnishing.
- 100% foodservice safe and NSF certified\*

**Experience Bugambilia and create a memorable feast for the eyes.**

\*NSF Certification on the following Classic Collection colors: Solid Black, Granite Black, Pure White, Marble White, Granite Gray. Testing conducted at independent labs in the U.S.A. according to NSF standards verify that all colors are 100% foodservice safe. Reports are available on request.
