**Subject: Mobile catering accessories for table-top units type 61-102**

**Date: 14.14.2012**

---

Dear Sir or Madam,

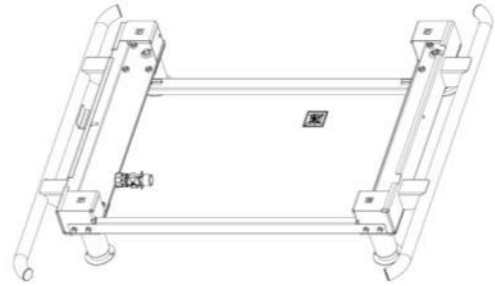

More and more often, clients require event catering companies to cook for guests directly at the event location. This means all those involved, including the cooking appliances, need to be as flexible and mobile as possible. To be able to offer these companies an optimum solution, RATIONAL has developed special "mobile catering accessories". These accessories can be used to move all SelfCookingCenter® whiteefficiency® and CombiMaster® Plus table-top units type 61-102 safely both to and at the event location.

A detailed description of the most important components can be found below:

**Catering kit for units 61/101 and 62/102**

A special catering kit has been developed for all SelfCookingCenter® and CombiMaster® units built since May 2004. These accessories (supporting frame + stainless steel feet) are fixed under the unit in place of the normal unit feet. The sturdy bar along the side is both for protection and for simple movement. In addition, the bars can also be used to carry the unit e.g. up stairs.

**Catering kit (retrofit for all table-top units built since 05/2004):**

Type 61/101 – part number: 60.73.111

Type 62/102 – part number: 60.73.141

Please note that a "height-adjustable transport trolley" must be used on account of changed unit heights when a mobile oven rack or mobile plate rack are used.

**Stand UG II in catering version (all table-top units built since 05/2004)**

The stand is equipped with extremely sturdy stainless steel wheels (2 x casters, 2 x fixed wheels). The large wheel diameter (200 mm) allows the unit to be moved on the stand even over uneven ground (e.g. roads). In addition, the stand has been reinforced at the side ensuring it is protected particularly well against damage. Special mounts secure the unit on the stand during transport. In addition, the rack rails in the stand have been designed in such a way that the GN accessories cannot slide out during transport.

Stand UG II can only be used with units that are equipped with a catering kit. In addition, the stand is only available in version UG III!

**Stand UG II in catering version**

Type 61/101 – part number: 60.30.890

Type 62/102 – part number: 60.30.891

The catering kit and the stand UG II for type 61/101 are available now! Versions for unit sizes 62 and 102 will be available from mid-January 2013!

Good luck with the new SelfCookingCenter® whiteefficiency® and the new catering accessories for table-top units.

Yours sincerely
