# Pump Panels with FOBs

## Standard Features

- Allows for a simple way to route beer lines, while maintaining a neat installation within your walk-in cooler
- Panels come standard with NSF approved FOB, which prevents beer loss
- FOB has a protective strainer along with a vent rinse manifold for easy maintenance
- Each Pump Panel comes standard with flojet G56 series pump, air hose, beer connector(s), nuts, tailpieces, washers, and hose clamps
- The pump is used to aid the flow of liquid during long runs, whether vertical, horizontal or through small diameter tubing
- The pump utilizes air and CO2 which never comes in contact with the beer, meaning the beer/wine will not be tainted
- Includes most accurate, tamper-proof, regulator in the beverage dispense industry
- Thanks to the design of the manifold, the regulator body can be repaired or replaced in the field with ease
- Panels are pre-drilled and made up of NSF approved material that can be sealed directly to cooler wall
- Significantly less pressure drop compared to the competition means less foam and more profit

Model	Overall Length (A)	Width (B)	# of Beer Lines	Weight (lbs)
KBP-PF1	17"	11"	1	9
KBP-PF2	17"	22"	2	11
