

HACCP COLOR-CODED THIN TIP POCKET THERMOMETERS

CDN offers thermometers that align with HACCP's preset color-coding system, which is designed to prevent cross contamination and to promote the high level of food safety that is mandatory in professional kitchens.

These advanced HACCP-coded models are exclusive to CDN. The CDN Thin Tip Pocket Thermometer (DTT450), an established bestseller, is available in the HACCP colors of Red (meat), Blue (seafood), Green (produce), and Yellow (poultry).

Easy to use, fast, accurate and cost effective, these models feature a 4-5-second response time, convenient data hold, a 1.5 mm thin tip, and field calibration. They have a wide temperature range from -40 to +450°F/-40 to +230°C.

Like all NSF[®] Certified CDN probe thermometers, the HACCP-coded models are treated with BioCote[®] for added protection against microbes when used with good hygiene and cleaning practices. BioCote[®] is an antimicrobial agent containing silver, which has been shown to inhibit the growth of bacteria, mold, fungi and other microbes on a product's surface.

FEATURES

- NSF[®] Certified
- 4-5 second response
- 1.5 mm thin tip
- Data-hold locks reading
- Food-safe ABS plastic with BioCote[®]
- Field calibration
- Stainless steel stem

SPECIFICATIONS

Measurement Range: -40° to +450°F/ -40° to +230°C

Display Size: 0.875 W x 0.3125 H (in)/
2.2 W x 0.8 H (cm)

Sensor Length: 2.75"/7.0 cm stem

Power: 1 LR44 included

Weight: 0.8 oz/22.7 g

UPC:

DTT450	0 18436 00461 5
DTT450-R	0 18436 00477 6
DTT450-G	0 18436 00478 3
DTT450-B	0 18436 00479 0

Other:

- High heat
- Shatterproof
- On/off button
- Auto-off after 10 minutes
- Temperature guide
- Sheath can be used as handle extension
- 2-way mounting: pocket clip/hook
