Oven Rack

The toughest oven racks on the market!

When using rotating ovens for mass production, you can lose quality control. New Age has the answer with oven racks that facilitate a more even bake by securely supporting the pans.

Our racks can accommodate a wider variety of muffin pans than any other rack on the market!

The secret is our unique design of the angle. A heavy duty rib allows just enough more space to accommodate muffin pans with larger cups while restricting "fall through" of standard pans. Two extra hard vertical ridges help your pans glide more smoothly on and off the rack.

New Age oven racks can take the heat!

Built of noncorrosive heavy duty aluminum, our racks will hold the weight even when heated up. Our special extrusions allow us to tie the rack to itself, restricting any distortion or warping.

Stainless Steel lifting devices designed for your oven model and brand.

Heavy duty, 4" diameter "Hi Temp" wheel casters.

1801A | Oven Rack
