Pro-Food Equipment Lubricant

Improve the performance longevity of your food equipment with Nemco's one-of-a-kind oil and grease products specially formulated and USDA-approved for food contact!

USDA Rated
H1
for food contact

Buy once. Buy the original.
Always look for this mark of quality

Slick Move

Using Nemco's breakthrough food-grade mechanical lubricant is like bringing your entire arsenal of food equipment to the fountain of youth—for improved performance, easier cleaning and greater ROI!

Make Money on Contact

With every food-equipment application, Pro-Food Lubricant introduces performance efficiencies that allow you to maximize every dollar spent on equipment purchase and every dollar saved on equipment maintenance.

- Lubricate slides, shafts, bearings and other parts where minimizing friction and wear is key to maximizing performance life.
- Create a rust-inhibitive coating on ferrous metal surfaces that are not stainless or aluminum.
- Leave a non-stick coating on surfaces that come in direct contact with proteins and other foods notorious for stubborn cleanup.

Protect the Integrity of Your Food

As the name implies, Pro-Food is USDA H1 rated to provide excellent lubrication where direct food contact is a possibility.

- Completely odorless and tasteless, Pro-Food won't affect your food flavor.
- Entirely sanitary and non-toxic, Pro-Food promotes optimum food safety.
- Versus conventional pump sprayers, Pro-Food's aerosol can sprayer doesn't involve refills and, therefore, eliminates the related potential for product waste, unnecessary labor and, most of all, the introduction of contaminants.

Suggested Uses

Pro-Food Lubricant alleviates noise and friction between interacting mechanical parts and creates a non-stick coating on food-contact surfaces that can otherwise be a challenge to clean.

General Specifications

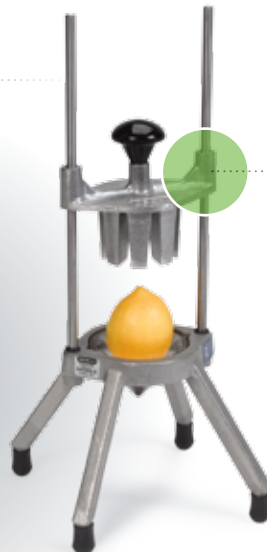

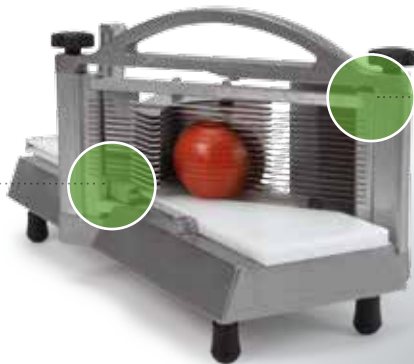

Model	Description	Amount
47709	Grease Gel	1 oz Tube
47709-50	Grease Gel	1 oz (case of 50)
56075	Oil Spray	16 oz Can
56075-12	Oil Spray	16 oz (case of 12)

NSF H1 Registered #054038 meets USDA H1 requirements for incidental food contact.

Especially developed for lubrication of food processing, packaging and restaurant equipment.

Serving a wide range of applications, Pro-Food Lubricant is available as a low-viscosity oil in a spray can or a high-viscosity grease in a tube.

For use on interacting mechanical parts and all food contact surfaces!
