General Information

Omcan Manufacturing and Distributing Company Inc., Food Machinery of America, Inc. dba Omcan and Omcan Inc. are not responsible for any harm or injury caused due to any person's improper or negligent use of this equipment. The product shall only be operated by someone over the age of 18, of sound mind, and not under the influence of any drugs or alcohol, who has been trained in the correct operation of this machine, and is wearing authorized, proper safety clothing. Any modification to the machine voids any warranty, and may cause harm to individuals using the machine or in the vicinity of the machine while in operation.

CHECK PACKAGE UPON ARRIVAL

Upon receipt of an Omcan shipment please inspect for external damage. If no damage is evident on the external packaging, open carton to ensure all ordered items are within the box, and there is no concealed damage to the machine. If the package has suffered rough handling, bumps or damage (visible or concealed), please note it on the bill of lading before accepting the delivery and contact Omcan within 24 hours, so we may initiate a claim with the carrier. A detailed report on the extent of the damage caused to the machine must be filled out within three days, from the delivery date shown in the shipping documents. Omcan has no recourse for damaged products that were shipped collect or third party.

Before operating any equipment, always read and familiarize yourself with all operation and safety instructions.

Omcan would like to thank you for purchasing this machine. It's of the utmost importance to save these instructions for future reference. Also save the original box and packaging for shipping the equipment if servicing or returning of the machine is required.

Omcan Fabrication et distribution Compañie Limité et Food Machinery d'Amérique, dba Omcan et Omcan Inc. ne sont pas responsables de tout dommage ou blessure causé du fait que toute personne ait utilisé cet équipement de façon irrégulière. Le produit ne doit être exploité que par quelqu'un de plus de 18 ans, saine d'esprit, et pas sous l'influence d'une drogue ou d'alcool, qui a été formé pour utiliser cette machine correctement, et est vêtu de vêtements de sécurité approprié. Toute modification de la machine annule toute garantie, et peut causer un préjudice à des personnes utilisant la machine ou des personnes à proximité de la machine pendant son fonctionnement.

VÉRIFIEZ LE COLIS DÈS RÉCEPTION

Dès réception d'une expédition d'Omcan veuillez inspecter pour dommages externes. Si aucun dommage n'est visible sur l'emballage externe, ouvrez le carton afin de s'assurer que tous les éléments commandés sont dans la boîte, et il n'y a aucun dommage dissimulé à la machine. Si le colis n'a subi aucune mauvaises manipulations, de bosses ou de dommages (visible ou cachée), notez-le sur le bond de livraison avant d'accepter la livraison et contactez Omcan dans les 24 heures qui suivent, pour que nous puissions engager une réclamation auprès du transporteur. Un rapport détaillé sur l'étendue des dommages causés à la machine doit être rempli dans un délai de trois jours, à compter de la date de livraison indiquée dans les documents d'expédition. Omcan n'a aucun droit de recours pour les produits endommagés qui ont été expédiés ou cueilli par un tiers transporteur.

General Information

Avant d'utiliser n'importe quel équipement, toujours lire et vous familiariser avec toutes les opérations et les consignes de sécurité.

Omcan voudrais vous remercier d'avoir choisi cette machine. Il est primordial de conserver ces instructions pour une référence ultérieure. Également conservez la boîte originale et l'emballage pour l'expédition de l'équipement si l'entretien ou le retour de la machine est nécessaire.

Omcan Empresa De Fabricacion Y Distribucion Inc. Y Maquinaria De Alimentos De America, Inc. dba Omcan y Omcan Inc. no son responsables de ningun daño o perjuicio causado por cualquier persona inadecuada o el uso descuidado de este equipo. El producto solo podra ser operado por una persona mayor de 18 años, en su sano juicio y no bajo alguna influencia de droga o alcohol, y que este ha sido entrenado en el correcto funcionamiento de esta máquina, y ésta usando ropa apropiada y autorizada. Cualquier modificación a la máquina anula la garantía y puede causar daños a las personas usando la máquina mientras esta en el funcionamiento.

REVISE EL PAQUETE A SU LLEGADA

Tras la recepcion de un envio Omcan favor inspeccionar daños externos. Si no hay daños evidentes en el empaque exterior, Habra el carton para asegurarse que todos los articulos solicitados estén dentro de la caja y no encuentre daños ocultos en la máquina. Si el paquete ha sufrido un manejo de poco cuidado, golpes o daños (visible o oculto) por favor anote en la factura antes de aceptar la entrega y contacte Omcan dentro de las 24 horas, de modo que podamos iniciar una reclamación con la compañía. Un informe detallado sobre los daños causados a la máquina debe ser llenado en el plazo de tres días, desde la fecha de entrega que se muestra en los documentos de envío. Omcan no tiene ningun recurso por productos dañados que se enviaron a recoger por terceros.

Antes de utilizar cualquier equipo, siempre lea y familiarizarse con todas las instrucciones de funcionamiento y seguridad.

Omcan le gustaría darle las gracias por la compra de esta máquina. Es de la mayor importancia para salvar estas instrucciones para futuras consultas. Además, guarda la caja original y el embalaje para el envío del equipo si servicio técnico o devolución de la máquina que se requiere.

Safety and Warranty

WARNING: IMPROPER INSTALLATION, ADJUSTMENT, ALTERATION, SERVICE OR MAINTENANCE CAN CAUSE PROPERTY DAMAGE, INJURY OR DEATH. READ THE INSTALLATION, OPERATING AND MAINTENANCE INSTRUCTIONS THOROUGHLY BEFORE INSTALLING OR SERVICING THIS EQUIPMENT.

FOR SERVICE ON YOUR GAS CHARBROILER

Please call the Omcan service department and ask for contact information for your local service company.

Safety and Warranty

This manual contains important safety instructions which must be strictly followed when using this equipment. Please retain this manual for future reference. Instructions must be posted in a prominent location. All safety precautions must be taken in the event the user smells gas. Safety information can be obtained from your local gas supplier.

FOR YOUR SAFETY

Do not store or use gasoline or other flammable vapors or liquids in the vicinity of this or any other appliance.

Equipment is designed to provide safe and productive processing, cooking and warming of food products as long as the equipment is used in accordance with the instructions in this manual and is properly maintained. Unless the operator is adequately trained and supervised there is a possibility of serious injury. Owners of this equipment bear the responsibility to make certain that this equipment is used properly and safely, and to strictly follow all of the instructions contained in this manual and the requirements of local, state or federal law.

Owners should not permit anyone to touch this equipment unless they are over 18 years old, are adequately trained and supervised, and have read and understood this manual. Do not attempt to repair or convert any gas types on your own. Repairs and conversions are to be made solely by an authorized servicer. Owners should also ensure that no customers, visitors or other unauthorized personnel come in contact with this equipment. Please remember that venter cannot anticipate every circumstance or environment in which its equipment will be operated. It is the responsibility of the owner and the operator to remain alert to any hazards posed by the function of this equipment. If you are ever uncertain about a particular task or the proper method of operating this equipment, ask your supervisor.

This manual contains a number of precautions to follow to help promote safe use of this equipment. Throughout the manual you will see additional warnings to help alert you to potential hazards.

If any warning labels or this manual are misplaced, damaged, or illegible, or if you require additional copies, please contact your nearest representative or supplier directly for these items at no charge.

Please remember that this manual or the warning labels do not replace the need to be alert, to properly train and supervise operators, and to use common sense when using this equipment.

TO AVOID SERIOUS PERSONAL INJURY AND PROPERTY DAMAGE

For your safety, do not store or use gasoline or other flammable vapors or liquids in the vicinity of this or any other appliances. Keep the area free and clear of combustible. (See ANSI Z83. 14B, 1991).

Improper installation, adjustment, alteration, service or maintenance of this equipment can cause property damage, personal injury, or death and voids warranty. Read the installation operating and maintenance instructions thoroughly before installing, or operating this equipment.

Instructions must be posted in a prominent location. All safety precautions must be taken in the event the user smells gas. If you smell gas, immediately shut off the main gas valve, extinguish all heat and flames, and call 911. Safety information can be obtained from your local gas supplier.

Safety and Warranty

IMPORTANT SAFEGUARDS & SAFETY INSTRUCTIONS

The charbroiler outside surfaces may become HOT after use. Use caution when touching the unit.

When using gas cooking equipment, basic safety precautions should always be followed, including the following:

- Never directly touch the burners or cooking grates while the charbroiler is on.
- Always turn off the unit when not in use, servicing or adjusting any parts or attachments, and before cleaning.
- Never leave the charbroiler on overnight.
- Do not operate any equipment with a damaged or leaking gas line, ignitor or valves or if the unit is dropped or damaged in any manner. Call for service.
- The use of attachments not recommended or sold by the manufacturer may cause fire, injury or even death.
- Do not use outdoors.
- Do not use this equipment for any use other than the use intended by the manufacturer.
- Never use the charbroiler as a heating source.
- The charbroiler does not contain any user-serviceable parts. Dealers or recommended qualified technicians should carry out repairs. Do not remove any components or service panels on this product.
- Never bypass, alter, modify or attach any unauthorized parts to this equipment. Doing so may create hazards and will void warranty.
- Vendor takes every care to ensure that all products are safe. Steel cutting procedures used to manufacture these items result in sharp edges. These sharp edges are removed to the best of our ability; however, we insist the operator take care when in contact with this piece of equipment.
- Always keep hands, hair and clothing away from heating source.
- Allow the charbroiler to cool down after use and before dismantling for cleaning; the unit will be too hot to handle immediately after use.

RESIDENTIAL USERS: vendor assumes no liability for parts or labor coverage for component failure or other damages resulting from installation in non-commercial or residential applications. The right is reserved to deny shipment for residential usage; if this occurs, you will be notified as soon as possible.

1 YEAR PART AND LABOUR WARRANTY

Within the warranty period, contact Omcan Inc. at 1-800-465-0234 to schedule an Omcan authorized service technician to repair the equipment locally.

Unauthorized maintenance will void the warranty. Warranty covers electrical and part failures, not improper use.

Please see <https://omcan.com/disclaimer> for complete info.

Safety and Warranty

WARNING:

The packaging components (cardboard, polyethylene, and others) are classified as normal solid urban waste and can therefore be disposed of without difficulty.

In any case, for suitable recycling, we suggest disposing of the products separately (differentiated waste) according to the current norms.

DO NOT DISCARD ANY PACKAGING MATERIALS IN THE ENVIRONMENT!

Installation

UNPACKING AND INSTALLATION

TO AVOID SERIOUS PERSONAL INJURY AND PROPERTY DAMAGE:

- ALWAYS install equipment in a work area with adequate light and space.

Installation

- ONLY operate on a solid, level, nonskid surface that is nonflammable and away from sinks and water hazards.
- NEVER bypass, alter or modify this equipment in any way from its original condition. Doing so may create hazards and will void warranty.

GAS AND GAS PRESSURE

Warning: installation must conform with the National Fuel Gas Code, ANSI Z223.1/NFPA 54, the National Gas Installation Code, CSA-B149.1, or the Propane Installation Code, CSA-B149.2 as applicable and in accordance with local codes.

Warning: the appliance and its individual shutoff valve (to be supplied by user) must be disconnected from the gas supply piping system during any pressure testing of that system at test pressures in excess of ½ psi (3.45 kPa).

These models are designed, built, and sold for commercial use only.

UNPACKING

Unpack the charbroiler immediately after receipt. Remove the gas charbroiler from the crate; remove all packaging on and surrounding the unit and be certain to remove all protective plastics and residues from all surfaces. Make sure that all parts provided including the L.P. gas conversion kit are located. Equipment must have the legs properly installed before use. If the machine is found to be damaged, save the packaging material and contact the carrier within fifteen (15) days of delivery. Immediately contact vender or your local dealer of the equipment. You have no recourse to damage after fifteen (15) days.

INSTALLATION

1. Read this manual thoroughly before installation and operation. DO NOT proceed with installation and operation if you have any questions or do not understand anything in this manual. Contact your local representative first.
2. Select a location for the charbroiler that has a level, solid, nonskid surface that is nonflammable and away from water hazards or sinks, and is in a well-lighted work area away from children and visitors.
3. Equipment must be installed under proper ventilation as required per local code.

NOTICE: local codes regarding installation and ventilation vary greatly by area. The National Fire Protection Association, Inc, states that local codes are “authority having jurisdiction” when it comes to requirements for installation of equipment. Therefore, installation should comply with all local codes.

4. This appliance is equipped for natural gas, for conversion to LP gas please see another conversion kits instruction.
5. Screw legs into the permanently fastened nuts on the four corners of the unit and tighten by hand. Legs must be installed to adequately provide proper ventilation to the unit.
6. Level unit by adjusting the four feet and tighten securely. The adjustable feet have an adjustment of one inch for lineup with other countertop lines. Do not slide unit with legs mounted, lift if necessary to move unit.

Installation

7. The supplied gas pressure regulator is factory set at 4" natural gas W.C. or 10" for L.P.
8. THESE UNITS ARE SUITABLE FOR INSTALLATION ON NON-COMBUSTIBLE SURFACES ONLY. Noncombustible clearances: 0" sides (0mm) 6" rear (152 mm) 4" floor (102 mm).
9. Do not obstruct the flow of combustion and ventilation air, under the unit by the legs or behind the unit by the flue. Do not place objects between the bottom of the unit and the counter top.
10. There must be adequate clearance for removal of the front panel. All major parts except the burners are removable thru the front if the gas line is disconnected.
11. It may be necessary to adjust the balance of gas volume and air supply to each burner. This must be done by an authorized service technician.
12. Pipe threading compound must be resistant to the action of liquefied petroleum gases.

COMMISSIONING

Commissioning of your new charbroiler is of the utmost importance. Commissioning is the thorough and methodical testing of the equipment, sub systems, and systems to ensure that the final product functions properly and safely at the work site. By identifying any potential problems (i.e.: equipment location, ventilation, local fire/electrical codes, installation, operator training and certification) prior to equipment being placed into service, costly outages and potential damages may be avoided.

CONVERSION KIT INSTRUCTIONS FOR GAS COUNTERTOP CHARBROILER

IMPORTANT SAFETY NOTICE

These conversion instructions are for conversion of the GAS charbroiler. The instructions provide in this kit are for the conversion of Natural Gas to L.P. gas and refer to the conversion of the unit and kit provided. An authorized licensed technician must be called to perform the complete conversion of the unit. Failure to properly convert this unit, can result in serious injury, property damage or death and will void warranty.

CHARBROILER CONVERSION KIT INSTRUCTIONS

Warning: do not attempt gas conversion by yourself. Gas conversion of your unit is to be made by a certified/licensed technician.

CONVERSION

Instructions are for conversion from Natural Gas to Propane (L.P.) on all models. The conversion should be done before connecting the unit to the gas supply. Units are shipped from the factory equipped for use on natural gas. Parts necessary for L.P. (liquid propane) are provided with the unit. Turn off the main gas supply before doing any maintenance.

1. Remove the knobs and front panel.
2. Unscrew bolts and pilot valve, then remove manifold.
3. Replace the orifice fittings into the valve.
Note: unit Number on side of orifice fittings.
4. Replace the front panel and knobs.

Installation

5. Before installing the included convertible regulator, unscrew the octagon cap. You can read (NAT) on the plastic insert attached to the head of the cap; flip it over and snap back in place.
6. Continue with installation.

Operation

Before operating charbroiler, it should be checked to see that it is sitting level. Adjust the feet to level the charbroiler. Be sure the catch tray has been properly placed.

The pilot light on the appliance have been set at the factory. Each burner has a pilot light.

1. Make sure all knobs are in the "OFF" position.
2. The main gas valve should be "CLOSED/OFF" for five (5) minutes prior to lighting pilots to clear any existing gas. (Main gas valve is supplied by others.)
3. Turn "ON/OPEN" the main gas valve to the unit.
4. Light and hold an ignition source (match) at the pilots. When the flame is established, remove the ignition source. Repeat this step for each burner as each burner has its own individual pilot. The pilot can be reached through the holes in the front of the unit.
5. Adjust the pilot valve, make sure the pilot flame at 1/2 inch height.
6. Turn each burner knob "ON". If the burners do not ignite promptly, turn the knobs "OFF". From the opening in the front panel, use a screwdriver and turn the pilot valve screw counterclockwise which will increase the flame height and repeat step 4.

If the pilot flame appears larger than necessary, turn it down and reset burner ignition. The pilot flames should be as small as possible but large enough to guarantee reliable ignition of the burners when the knobs are turned to "ON". The holes located in the front panel are pilot valve adjustments. Use a screwdriver to turn the valve to adjust the flame height to your desired level.

Caution: all burners are lit from constantly burning pilots. Turning the valve to the desired flame height is all that is required to put the unit in service.

IGNITING THE BURNER

To ignite the burner, turn knob to the "ON" position. Then back off to the desired flame level. The range of adjustment is virtually infinite between "ON" and "OFF". The space between the legs at the bottom admits combustion air. **DO NOT BLOCK THIS SPACE.** All burners are lit from constantly burning pilots. Turning the valve to the desired flame height is all that is required to put the unit in service. Do not permit fans to blow directly at the unit. Wherever possible, avoid open windows next to the unit's sides or back. Avoid wall type fans which create air cross-currents within a room. It is also necessary that sufficient air should be allowed to enter the room to compensate for the amount of air removed by any ventilating system. Otherwise, a subnormal atmospheric pressure will occur, affecting operation and causing undesirable working conditions. A properly designed and installed hood will act as the heart of the ventilating system for the room or area in

which the unit is installed, and will leave the unit independent of changing draft conditions.

NOTE: it may be necessary to adjust the balance of gas, volume and air supply to each burner. This must be done by an authorized service technician.

OPERATING THE CHARBROILER

Prior to operating your new charbroiler, thoroughly wash the exterior with a mild detergent or soap solution. Do not use abrasive cleaners, since this might damage the cabinet finish. If the stainless steel surfaces become discolored, scrub by rubbing only in the direction of the finished grain. Turn the burners on about 15-20 minutes before cooking for preheating. Set the knobs to the desired flame height or temperature. Each valve will control the gas flow to the burner to bring that area of the unit up to the set temperature. If different temperature settings are to be used, adjoining areas should be set at progressively higher temperatures using the lowest temperatures on the outside burners. A uniform and systematic approach to the loading of the unit will produce the most consistent product results.

NOTE: when the charbroiler is first heated, it will smoke until oil used in manufacturing, preservation and dust from storage and shipping are burned off. An hour at "max." on all burners is usually sufficient.

RADIANT CHARBROILER

1. Place the angled radiants in their position as shown in Fig. 8-1.
2. Make sure that the radiants are setting properly into the slots on the front and rear supports. Radiants should be centered over straight section of the burners.

COOKING GRATES

Place the top cooking grates with the grid bars angled toward the front as shown in Fig. 8-2. Or, place the grid bars flat, not angled for cooking.

NOTE: when cooking grates are placed angled toward the front, the grooves on top will guide the excess fat drippings into the grease trough.

The cooking grates are heavy duty cast iron which will oxidize if emerged in water. Lightly oil grates if not being used regularly.

Operation

Fig. 8-1

Fig. 8-2

SHUTDOWN BURNER

To turn 'OFF' the appliance completely, turn the gas control knob completely clockwise to the 'O' position, the pilot burner will extinguish.

Maintenance

CLEANING INSTRUCTIONS

CAUTION

- DO NOT use any abrasive or flammable cleaning fluids.
- DO NOT hose down, immerse or pressure wash any part of the charbroiler, excluding the catch tray.
- NEVER use a scrubber pad (on all exterior surfaces, except the charbroiler plate), steel wool or abrasive material, or cleaners containing chlorine, iodine and ammonia or bromine chemicals as these will deteriorate the stainless steel and shorten the life of the unit.

IF CLEANING ALL THE CHARBROILER'S SURFACES, THE MAIN GAS VALVE MUST BE SWITCHED TO THE CLOSED POSITION. AFTER CLEANING, THE GAS LINE CAN BE SWITCHED BACK TO THE OPEN POSITION. PLEASE FOLLOW THE LIGHTING INSTRUCTIONS IN THIS MANUAL TO RELIGHT THE CHARBROILER'S PILOT LIGHTS AS NEEDED.

Maintenance

RECOMMENDED CLEANING

It takes very little time and effort to keep the charbroiler attractive and performing at top efficiency. Wait until the charbroiler is cool after the unit has been turned off. Please follow the cleaning steps below:

Part	Required Action	Frequency
Body, back and side splashes.	Use a clean cloth and a non-abrasive cleaner to clean the stainless steel body of the charbroiler.	Daily.
	Wipe the polished areas with a soft cloth.	Daily.
Controls.	Unit should be turned off when not in use.	Daily.
	It is recommended that the unit be disconnected from the gas supply by closing the main gas valve.	Daily.
	Use a clean cloth to wipe any down controls and/or knobs.	Daily.
Grates and radiants.	<p>Caution: when handling grates/grids or radiants, always use insulated gloves to prevent burns.</p> <ul style="list-style-type: none"> • Place grates on broiler, with grid bars horizontal, facing down. • Turn the broiler on for approximately 45 minutes. • Turn off the broiler and allow it to cool for 20 minutes. • Clean top and bottom surfaces of grate with a wire brush to remove animal fats and carbonized grease. • Clean channels on grates with a scraper. • Remove grates from broiler. Clean top surface of radiants with the wire brush. They may be cleaned in place. <p>Warning: do not cover the top of the grates grid during a burn off operation. Restricting the airflow by covering the grid grates may cause them to warp. It will also cause damage to the valves, the knobs and the front panel decal.</p>	Daily or as needed.
Char grate back support brace.	Once the unit has cooled, remove the cast iron grates Lift the support brace up off of the back splash guard. Clean and de-grease/remove debris from char grate back support brace. Once the char grate back support brace is clean, reinstall it back into place.	Daily or as needed.
Catch tray.	<p>Once the unit has cooled, remove the catch tray and discard the waste, grease/debris and crumbs.</p> <p>CAUTION: if the catch tray is permitted to fill too high, grease/debris is likely to accumulate under the unit. The catch tray/drawer is removed by pulling forward.</p> <p>USE CAUTION WHEN REMOVING!</p>	After each use / daily.

Maintenance

Burner air shutter openings.	Main burner ports must be kept clean. Close the gas valve to the unit, shutting off the gas and extinguishing the pilot light. Clean in place with a wire brush, or clean gas ports with a sharp-pointed metal instrument to insure open ports; or the burners may be removed and washed in soapy water for 15-20 minutes.	As needed.
Regulator.	Make sure the vent is open and not blocked in any way. Failure to do so will cause variations in pressure. Your unit will not function as well and it could shorten the life of the product.	Monthly.

Troubleshooting

ISSUE	CAUSE	SOLUTION
Charbroiler not lighting.	Main gas line is closed.	Open valve.
	Pilot light is not lit.	Ignite pilot light.
	Cause unknown.	Call for service.
Flame is too high or too low.	Adjustment knob is turned up or down.	Adjust flame with control knob.
Pilot light not staying lit.	Flame is too low.	Adjust pilot light flame height.
	Pilot tube clogged.	Replace pilot tube. Call for service.
Strong smell of gas in cooking area.	Main gas line leak.	Turn off main gas valve. DO NOT LIGHT FLAME, ignite anything, or turn/switch on anything electrical. Call fire department if needed and call for service.
Cooking surface is heating up slowly.	Carbon build up.	Ensure that the burners are kept clean and free from carbon build up / debris.
Gas type of unit needs to be converted.	Unit ships from the factory natural gas. Conversion from natural gas to L.P. is possible for this unit.	Contact an authorized servicer or vender. Do not attempt conversion on your own.

If problems persist and the assigned solution does not remedy the issue, please call service department or your local service company.

Thank you for choosing Omcan | Merci d'avoir choisi Omcan | Gracias por elegir Omcan

Since 1951 Omcan has grown to become a leading distributor of equipment and supplies to the North American food service industry. Our success over these many years can be attributed to our commitment to strengthen and develop new and existing relationships with our valued customers and manufacturers. Today with partners in North America, Europe, Asia and South America, we continually work to improve and grow the company. We strive to offer customers exceptional value through our qualified local sales and service representatives who provide convenient access to over 6,500 globally sourced products.

Depuis 1951 Omcan a grandi pour devenir un des “leaders” de la distribution des équipements et matériel pour l’industrie des services alimentaires en Amérique du Nord. Notre succès au cours de ces nombreuses années peut être attribué à notre engagement à renforcer et à développer de nouvelles et existantes relations avec nos clients et les fabricants de valeur. Aujourd’hui avec des partenaires en Amérique du Nord, Europe, Asie et Amérique du Sud, nous travaillons continuellement à améliorer et développer l’entreprise. Nous nous efforçons d’offrir à nos clients une valeur exceptionnelle grâce à nos ventes locales qualifiées et des représentants de service qui offrent un accès facile à plus de 6500 produits provenant du monde entier.

Desde 1951 Omcan ha crecido hasta convertirse en un líder en la distribución de equipos y suministros de alimentos en América del Norte industria de servicios. Nuestro éxito en estos años se puede atribuir a nuestro compromiso de fortalecer y desarrollar nuevas relaciones existentes con nuestros valiosos clientes y fabricantes. Hoy con socios de América del Norte, Europa, Asia y América del Sur, que trabajan continuamente para mejorar y crecer la empresa. Nos esforzamos por ofrecer a nuestros clientes valor excepcional a través de nuestro local de ventas y representantes de los servicios que proporcionan un fácil acceso a más de 6,500 productos con origen a nivel mundial.
