## Bon Chef introduces a full collection of the **PowerCoat Evolution**.

We are proud to introduce four new trending colors: Leather, Burnt Umber, Espresso and Black Diamond. These colors range from high gloss to satin matte and provide what all food service operators are looking for: **The WOW Factor**.

All colors in the **PowerCoat Evolution** Line are done in house on any Bon Chef Stainless Steel Chafer, Heat Lamp, Coffee Urn, Marmite, and even wine buckets! All **PowerCoat Evolution** coating is done in Bon Chef's own factory in New Jersey.

Lead time is 1-2 weeks (on stock items) and the process is done by our skilled tradesmen who have years of experience coating Bon Chef's Sandstone, Nero and other lines.
