

Propelled by Minnow™

Pass-Through Pickup Pod™

Models: MPP-8PT, MPP-8HPT

Hatco's heated or ambient Pass-Through Pickup Pod™, propelled by Minnow™, helps automate customer and delivery pickups. These self-service, touchless pickup solutions reduce lobby/dining area congestion. They eliminate pickup mistakes, reduce labor costs, and improve the takeout experience for all. As a pass-through unit, the operator can easily fill orders from the back of the house to help streamline the delivery process, and customers and delivery people simply access their reserved cubbies by scanning the QR code or using the embedded link sent via SMS. All of this is done without waiting in line or needing to ask for help from front of house staff. Unlike unsecure tables, the Pass-Through Pickup Pod keeps food fresh and secure until ready to be picked up.

Standard features

- Available in either heated or ambient styles with eight unit pods
- Heated units are thermostatically controlled with an operational range of 140°F to 185°F (60°C to 85°C)
- Heated pods may also be operated in Ambient Mode
- Offers customers and delivery workers a touchless experience via their own devices with QR code and SMS messaging
- Energy-saving 5000K LED cubby lighting showcases food
- Each individual pod is 13.58" W x 20.64" D x 14.49" H (345 x 524 x 368 mm)
- The antimicrobial surfaces and touchless interface work in tandem to inhibit the spread of bacteria, mildew and germs
- Plug into a standard 120V outlet and units are ADA compliant
- Has rear door handles which allow for minimal contact and easy access
- Connects via Cellular, WiFi, or CAT-5/6

NOTE: SaaS (software as a service) fees are required for each unit. Contact factory for subscription fee options.

SaaS fees enables cloud connectivity, user interface and data analytics.

NOTE: Hatco Pickup Pod does not require a customer mobile app or needs to be integrated with a POS. Works with any delivery service. Toast and Square integration is available.

IFS anti-microbial coatings use naturally-occurring, environmentally sustainable, silver ions to help inhibit the growth of microbes on the powder coated surface. See www.hatcocorp.com/antimicrobial-paint for more information.

For operation, location and safety information, please refer to the Installation and Operating Manual.
