Models specifical	ly designed for	ENERGY STAR®	qualification,	low flue tem	nperature
and high-volume	frving of bone	e-in chicken and	l other fresh ƙ	oreaded prod	ducts

- ☐ LHD165 (without filtration)
- ☐ FPLHD265

☐ FPLHD365 ☐ FPLHD465

- ☐ FPLHD565
- ☐ FPLHD665

FPLHD265 with 3000 controller and front oil disposal.

Standard Features

- Thermo-Tube frypot design
- ENERGY STAR® qualified. Eligible for energy-saving rebates.
- Low flue temperature (<550°F/287°C)
- 100-lb (50-liter) oil capacity
- 105,000 Btu/hr. (26,448 kcal/hr) (30.8 kw/hr.)
- Frying area: 18" x 18" x 5-3/4" (46 x 46 x 15 cm)
- SMART4U® 3000 controller
- · Electronic ignition
- · Wide cold zone
- · Built-in filtration (batteries only)
- · 8 GPM filter pump
- · Heat tape wrapped filter lines
- Drain safety switch
- Drain flush, 1-1/2" drain valve, 3" drain
- Basket rack(s)
- · Basket hanger(s) with flue deflector
- Two dual baskets
- · Stainless steel frypot, door, front and sides
- 11" plate shelf with marine edge

Options & Accessories

Basket hanger with flue deflector

Dual basket

Triplet basket Full basket

L-shaped basket rack

Screen type basket rack Thermatron controller

Front discharge with 5' wand

Rear discharge

Splash shield Frypot cover

Flue deflector

One-piece manifold with tee -- located behind second frypot from left for FPLHD565 models only

 \sqcup Sediment tray

Recommended Standard Accessory Packages

Standard Frying:

- Basket support rack(s) (8102235)
- Basket hanger with flue deflector(s) (8235859)
- Dual size baskets (8030304)

Bone-in Chicken:

- · L-Basket support rack(s) (8103066)
- Flue deflector(s) (8235801)
 Full size basket(s) (8030148)

Recommended standard accessories can be ordered per frypot. Example: HD265 -- one standard frying package and one bone-in chicken package.

Specifications

The LHD65 low flue temperature fryers are large capacity gas systems, with an 100-lb. (50-liter) oil capacity, and a cooking depth of 5-3/4" (15 cm) per frypot. These ENERGY STAR® qualified, large vat fryers are specifically designed to fry bone-in chicken and other fresh breaded products.

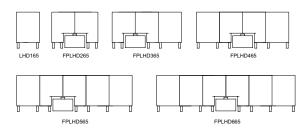

The built-in filtration system on batteries saves valuable floor space. An 8 GPM pump makes filtering fast, safe, and convenient, encouraging frequent filtering, which extends the useful life of oil.

The cold zone holds heavy sediment and debris away from the cooking area so that they cannot cling to fried products or contaminate the oil. The bottom of the frypot is sloped toward the front for fast, thorough draining.

The SMART4U® 3000 controller has operation management features that monitor and help control food and oil quality, oil life, and equipment performance. It has 20 programmable cook buttons and auto adjusts cook time to load size. The segmented cooking feature allows programming a cook with up to five different set temperatures and times as desired for cooking bone-in

With 105,000 Btu/hr input, exclusive thermo-tube design, and controlled flow diffusers, this high performance fryer provides maximum production, forcing energy into the oil, with less going unused up the vent. Exhaust temperatures are 550°F or less. The benefit is fast heatup and recovery times, low idle costs, lower ambient temperatures, and low gas consumption per pound of

This unit is shipped standard with stainless steel frypot, door, front, and sides.

HOW TO SPECIFY -- EXAMPLES

The following description will assist with ordering the features desired for this equipment:

Single high-volume, low I HD165 flue temperature gas fryer, 105,000 Btu/hr, 3000

controller and casters Battery of 2 high-volume, FPLHD265 low flue temperature gas fryers, 105,000 Btu/hr, 3000 controllers

FPLHD365 - Battery of 3 high-volume, low flue temperature gas fryers, 105,000 Btu/hr with space-saving under fryer filter, 3000 controllers, and casters.

Please specify gas type.

- 1-1/2" (3.8 cm) kitchen main manifold gas supply line required. Gas inlet size (I.D.) should be no smaller than that provided for connection to the fryers. See service manual and/or plumbing codes for proper pipe sizing. Recommended minimum store manifold pressure to be 6" W.C. for natural gas and 11" W.C. for L.P. gas. Check plumbing codes for proper supply line sizing to attain burner manifold pressure of 3.0" W.C. natural or
- 8.25" W.C. L.P.
 POWER CORDS: On 1 and 2 battery units, 1 power cord supplied On 3 and 4 battery units, 2 power cords

supplied On 5 and 6 battery units, 3 power cords

supplied DO NOT CURB MOUNT

• A minimum of 24" (61.0 cm) should be provided at the front of the unit for servicing and proper operation, and 6" (15.2 cm) between the sides and rear of the fryer to any combustible material.
