

Constructive Features

- cooking vessel in stainless steel AISI 316 (thickness 25-40/10) specifically intended for the processing of particularly acid products. Jacket in stainless steel AISI 304. Vessel with electric tilting on front part
- insulated lid with double cover in stainless steel AISI 304, with ergonomic handle, balanced by means of gas springs
- self-supporting frame in stainless steel AISI 304 (thickness 30-40/10)
- heat insulation guaranteed by panels in thick glass fibre
- outer cover in stainless steel AISI 304, fine satin finish (thickness 12-15/10)
- adjustable feet in stainless steel AISI 304 to ensure levelling, with removable cover for cleaning operations
- fast accessibility to the main functional parts (electronic card, fuses, thermostats...) only removing the frontal panels
- protection level IPX5

Functional Features General

- heating by means of armoured elements in INCOLOY-800 alloy, controlled by electronic board with automatic activation of minimum 4 °F before the SETPOINT and by pressure switch set at 8.7 PSI to prevent steam outlet from the safety valve and unnecessary power waste
- temperature control by means of two probes (product, jacket)
- breather valve eliminating air from inside the jacket to make heating faster using saturated steam
- pressure controlled by means of pressure switch 8.7 PSI, safety valve (12.3 PSI), vacuum valve and analogic pressure gauge
- electronic control by means of multifunctional keyboard with Touch Screen 7" and easy and clear messages
- USB connection to download HACCP data, update the software and load cooking programs
- ability to interrogate the machine using communication protocol MODBUS over RS485 serial interface
- connection for power economizer
