

Mini Water Boost System

804-001 (60 psi/4 bar)

804-002 (90 psi/6 bar)

FEATURES :

- Electric Water Boost pump which increases city water pressure and flow to the dispenser valve which maintains brx.
- Accumulator holds 6 oz. of water under pressure. 24 oz. total capacity (air and liquid).
- The accumulator reduces pump cycling.
- Equipped with a Shurflo pressure reducing valve for added safety against fluctuating water pressure and flow, the pressure reducing valve eliminates the need for costly water regulators.
- Adjustable Pre-charge pressure.

The increase in popularity of non-carbonated drinks and the inconsistency of city water pressure and flow requires the need for a water boost system to deliver quality drinks in many installations. The Shurflo Mini Water Boost System will support two standard flow valves or one fast flow valve.

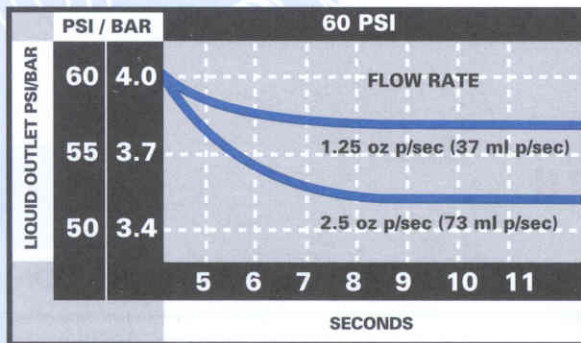

MATERIALS :

Bladder - Butyl

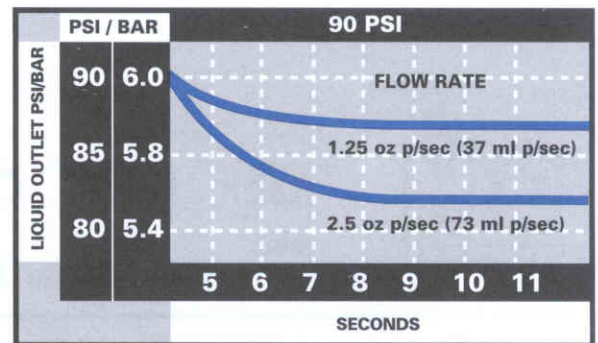

Tank - Glass filled nylon

Pump - Nylon, EPDM, Santoprene, 316SS
