Texican

Tortilla Chip Serving Cabinets

The lower access door opens to form a shelf, easing the serving of chips into baskets and reducing breakage.

"Chip Master" Model CD-45

- 22 gallon chip capacity is ideally suited for taquerias, back bars and restaurants.
- Simple to use, just load chips in the top and serve from the hottom.
- Stainless steel construction inside and out makes cleaning easy.
- Thermostatic temperature control reduces operating costs.
- **Customer satisfaction guaranteed.**
- The first choice of operators who understand value and durability.

Serving cabinet shown with .220" thick clear Lexan loading doors. Optional .250" thick anodized aluminum loading doors available at a small cost.

The convection style thermostatically controlled heating system maintains constant temperatures by moving heated air throughout the interior.

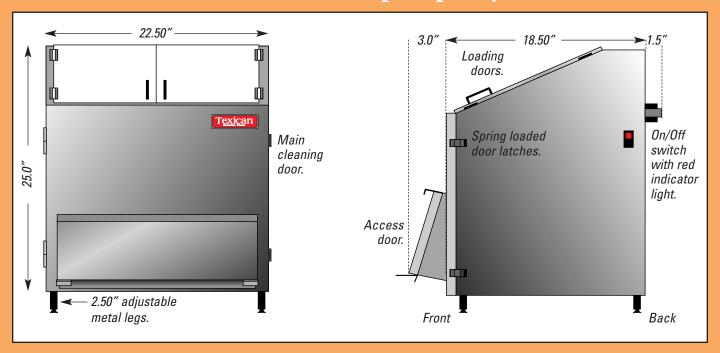

Rugged quality construction with high density insulation means years of trouble free service low operating costs.

The entire front door assembly swings open for cleaning. Just unsnap the latches, remove the perforated interior bottom panel and wipe down the interior surfaces. Daily cleaning ensures fresh chips every day.

Serving satisfied customers since 1989. Simply better than the rest.

"Chip Master" Model CD-45

22 Gallon Chip Capacity

Option: .250 thick anodized aluminum loading doors.

The entire front door assembly swings open for cleaning.

A removable perforated interior bottom panel is easily removed to make cleaning an easy task.

The "Chip Master" CD-45 has double pan access door that opens to form a shelf, easing the loading of chips and reducing breakage or spills. A special interior baffle directs the flow of chips from the rear to the front ensuring the chips you serve will always be in peak condition.

The dispenser is equipped with a 60-250 d thermostat and a high temperature limit control to prevent overheating, ensuring consistent temperatures.
