## Safety Start Up

After power on, if you do not press the temperature adjust button, it will turn off automatically.

## Small Object Detection

If small objects such as spoons, or knives are detected, it will not operate.

## Empty Pot Detection

If you set the induction warmer to heat the pot without any liquid inside, it will detect and automatically turn off.

## Suitable Pots

Pots made of iron, iron enameled, cast iron, stainless steel, with a flat bottom diameter at least 4", or any other pots that are designed for induction devices.

## Unsuitable Pots

Pots made of glass, aluminum, copper, ceramic or any other materials that are not magnetic are not suitable for induction.
