EZ Fit Smart Bowls

US Patent #9,918,571

The Bon Chef Smart Bowl System was specifically designed to fit all NSF-7 & Non NSF-7 Mechanical cold well manufacturers including standard & custom wells using our specialized support bars without the use of an under-shelf.

In order to maintain a NSF food temperature of 41°F, the Smart Bowls should be used in an NSF- 7 Mechanical Cold Wells. Smart Bowls must be pre-chilled in refrigerator for a minimum of two (2) hours and then filled with pre-chilled food (38°F or colder) just prior to set up.

Smart Bowls can be used with Non NSF-7 Wells and many times the proper temperature can be achieved, however, Bon Chef makes no claim on maintaining food temperatures for Non NSF-7 wells.
