

Redefining Healthcare Food Service

Induction Table

Model Numbers:

AIT1, AIT1M

With Alluserv you are not just buying a product. You are receiving our team's service commitment to get the most value from your investment in our products. We will provide you with:

- A team of knowledgeable experts with over 100 years of combined experience to help you understand and receive the most from your product throughout its service life
- Detailed instructions and specification on cleaning and application to best maintain your equipment
- A national service network and service manuals for our extensive product offering.

INDUCTION TABLE

APPLICATION

Mobile or stationary, the Alluserv Induction Table is designed to hold induction chargers at an ergonomic working height. The 30" L x 24" D shelf size not only holds the charger, it still has plenty of room to stack your Induction bases or Induction plates. The under shelf has plenty of space for any kitchen equipment you want to keep close and secure.

CONSTRUCTION

The induction table will have a top that will be constructed of 14-gauge stainless steel with a No. 4 finish and has a full marine "V" edge. The top of the table has 14-gauge under brace hat channels welded in place for additional support. The legs on this table are 1.625" 16-gauge stainless steel round tubing that is fully welded to the top hat channel under brace support and under shelf.

The under shelf for this table is constructed of 16-gauge stainless steel with a No. 4 finish welded to the legs.

The mobile units (AIT1M) come with four 5" swivel polyurethane casters, two with brakes.

Induction Table
