

Prefilter Systems | PF

PF-10

The Prefilter System is designed to remove dirt, sediment, suspended solids, and other particles before the water reaches the main filtration system. The system, which uses a 10 micron filter, is mounted before the main filtration system in order to prolong the life of the cartridges used in the filtration system.

Keep a minimum of 2" (5.1 cm) under the system for easy cartridge changes. The system includes the cartridge, housing, mounting bracket, and filter wrench.

FEATURES

- Removes dirt, sediment, suspended solids, and other particles from water.
- Prolongs life of main filtration system.
- 10 micron filter captures particles.
