Super Erecta® Shelf Dunnage Shelves — DR Series

Super Erecta® Dunnage Shelves offer considerably more weight-bearing capacity than other Super Erecta Shelf shelves.

- **Superior Strength:** Dunnage shelves can be combined with other Super Erecta® Shelf shelves to provide extra strength at the lower levels of a shelving unit where the heaviest loads will be placed.
- **Stress Resistance:** The high static-load capacity of the Super Erecta® Shelf dunnage shelf translates into an increased ability to stand up under the strain of unbalanced loads and the stress of materials repeatedly being placed on the shelf in a less-than-gentle way.
- **Super Erecta® Shelf Construction:** These dunnage shelves have the same tapered corners and split sleeves that fit the 1" (25mm) posts used for other Super Erecta® Shelf shelving. As a result, they assemble easily and fit securely.
- **Easy-to-Clean:** Removable wire deck fits over reinforced 1" (25mm) square, tubular frame. It lifts off for easy, thorough cleaning.
- **Smooth Loading / Unloading:** The front-to-back upper ribs of the deck allow you to slide items on and off the shelves smoothly.
- **Adjustable:** Rolled grooves on the posts enable dunnage shelves to be positioned or repositioned at desired levels in 1" (25mm) increments.
- **Choice of Finishes:** Chrome-plated for dry storage; Metroseal™ Epoxy (green or gray), and Type 304 stainless steel for corrosive environments.
- **Metroseal:** Proprietary rust-resistant finish is a durable epoxy coating over a protective zinc substrate. Metroseal contains Microban® antimicrobial product protection that helps fight the growth of stain and odor-causing bacteria to keep product cleaner between cleanings. 12-year limited warranty against rust and corrosion.
- **Load Capacity:** The 24" (610 mm) to 36" (914 mm) length has a 1,600-pound (725 kg) evenly distributed static load capacity; the 42" (1067 mm) to 48" (1219 mm) shelves hold up to 1,300 pounds (590 kg), the 54" (1372 mm) and 60" (1525 mm) length hold up to 1,000 pounds (450 kg).

Super Erecta® Shelf Dunnage Shelves — DR Series

Dimensions

Shelves

- The shelf support frame is made of 1" (25 mm) square tubing.
- The removable wire deck is formed from 5/16" (7.9 mm) diameter wire.

Important:

- Stability decreases as the ratio of height to width increases when heavier loads are placed on upper shelves. Keep units as wide and low as possible, using the dunnage shelf as the bottom shelf. If two dunnage shelves are being used, both should be placed within the lower half of the unit. Dunnage shelves are not recommended for use in shelf carts or trucks.
- S-Hooking not available for dunnage shelving.
