***Bottle Wells  
 for Potable Ice***

BW3, BW4

***Product Information***

Bottle Wells are PVC plastic molded bottle holders that are placed in a potable ice bin to hold ice chilled mix ingredient pour and store bottles. The plastic well keeps the bottles out of direct contact with the ice. There are two sizes of wells: 3-bottle, model number BW3, for 19" deep ice bins and 4-bottle, model number BW4, for 24" deep ice bins. The 3-bottle version is also used with the IB-38X24 pass thru ice bin.

A bottle well may be placed on one or both sides of an ice bin and it is designed with a special ledge on one side to hold a sliding ice bin cover. When bottle wells are ordered with an original ice bin, the correct, smaller sliding ice bin cover is automatically provided.

For three bottles stored on one side of a 19" deep ice bin, specify one model number BW3. For three bottles stored on both sides of a 19" deep ice bin, specify a quantity of two BW3.

For four bottles stored on one side of a 24" deep ice bin, specify one model number BW4. For four bottles stored on both sides of a 24" deep ice bin, specify a quantity of two BW4.
