solutions and options.

### Product description

Place the compact, space saving model CSP Assisted Sales flexibly where you need it. The powerful, durable system delivers top results even for demanding products to be cut. The CSP for assisted sales is designed to save space: The floor model measures only 1 m in height and 80 cm in width. This device is optimally suitable for a wide variety of baked goods having a length of up to 39 cm - long or round bread, hard or soft texture, with or without nuts: The CSP circular blade slicer cuts precise and visually appealing slices. Operation becomes so much easier: With intuitive touch screen operation and a dial, you select the appropriate slice thickness in no time and slice an entire loaf of bread, half it or cut a desired number of slices. The innovative SmarterSlicing functions allow an hygienic environment around the bread slicer at any time. An early warning system by means of indicators notifies you when the CSP is due for cleaning and when the blade requires sharpening or maintenance. Smart technology which ensures hygiene and availability of your machine. What's particularly convenient: Very smoothly running slicing process. Even at maximum performance, the planetary gear operates smoothly and is virtually maintenance-free. Convenient cleaning: Simply roll out the CSP to clean it all around.

### Highlights

- Easy operation:
  - Numerous setting options at the touch screen: Half a loaf or slicing the entire loaf, slice thickness, number of slices, halving, quick selection keys
  - Quick slice thickness adjustment with the dial: With one turn the desired slice thickness
- Gentle slicing for best product quality:
  - The narrow product holder securely holds the product producing only minimal waste
  - Controlled slicing: The blade speed is controlled separately. This allows gentle blade start-up and cutting of large round loafs of bread without hold-down device
  - Tilted bread chute for perfect stability
- Ergonomic bagging aid:
  - Right above the bread chute to prevent any crumbs or slices of bread from falling to the floor
  - Easy bagging
- Easy cleaning:
  - Safe upward position for blade cleaning in the bread chute
  - Hygienic design without dirt trapping corners
  - Electronics and drive components protected from crumb area to prevent bread crumbs from getting in contact with them

### Options

- Design colors: Stainless steel or powder-coated black
- Bagging station
