

DineXpress®

MODULAR SERVING LINES

DINEX®

WHY DINEXPRESS[®] MODULAR SERVING COUNTERS?

DineXpress is a customizable and modular serving system that will boost your retail sales. Create an enhanced dining experience for front-of-house while increasing efficiency and productivity in back-of-house.

Key applications include, but are not limited to:

- Healthcare Cafeteria and All Day Dining
- Education K-12 and University
- Hospitality
- Employee Break-Room

Dinex Healthcare Solutions App

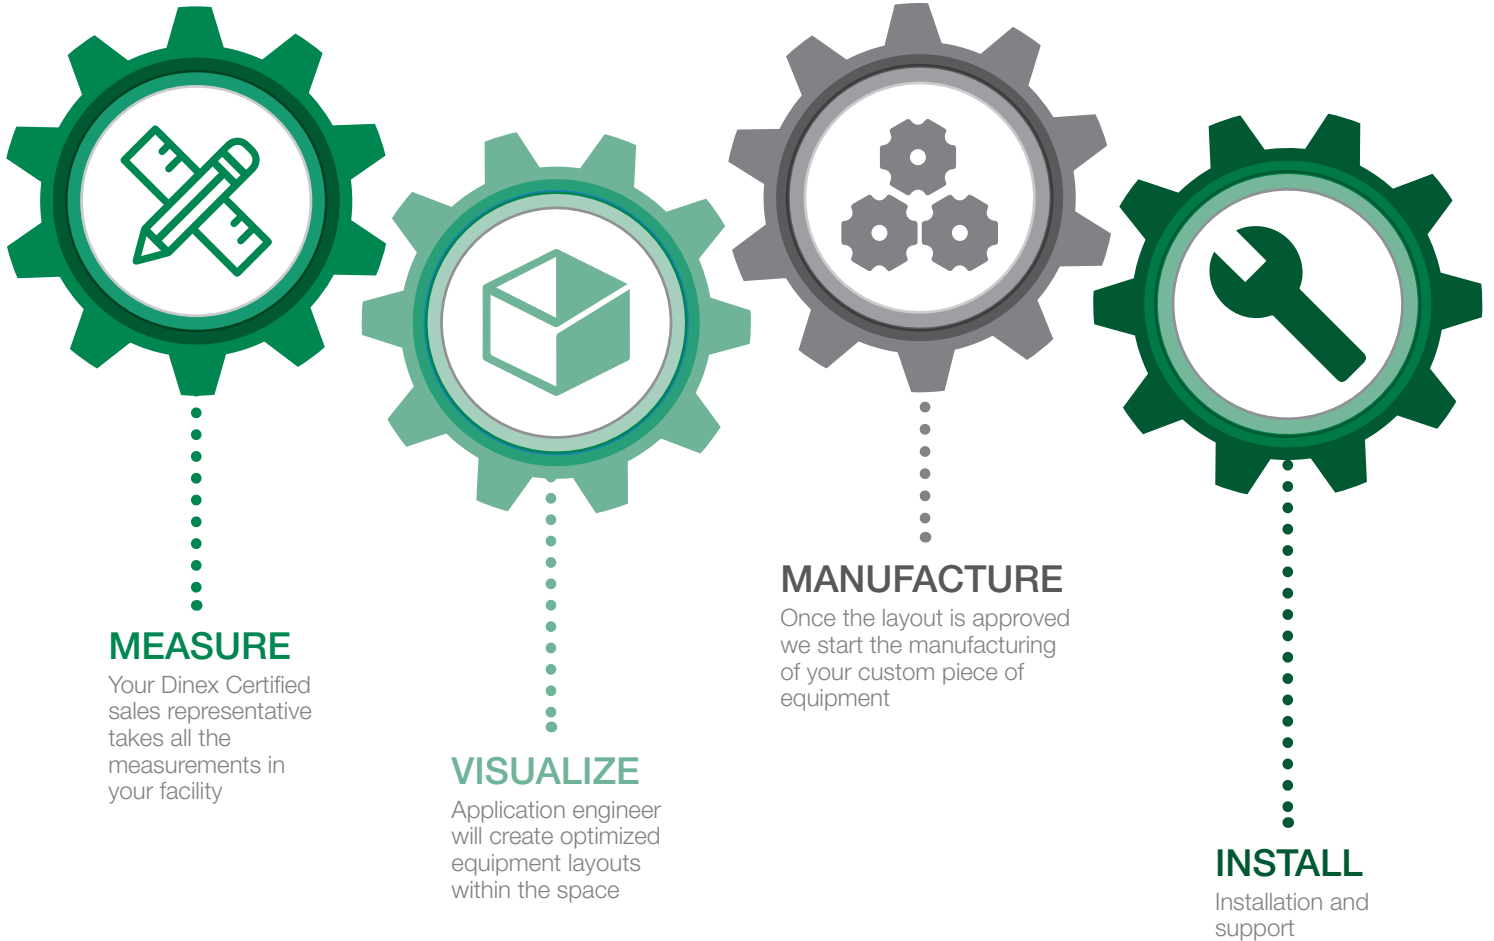

Download the companion app to explore easy-to-use interactive environments. Access product videos and sales literature within the app or email it while viewing all the product solutions.

OUR DINEX CONSULTATIVE TEAM SUPPORT APPROACH THROUGHOUT THE PROJECT

will assist with upgrading your front-of-house serving line by collaborating with you and your team to come up with efficient layouts for optimizing traffic flow, experience, food temperature and service needs.

DINEXPRESS®

The perfect solution for front-of-house dining areas or back-of-house prep stations.

Stainless Steel Construction

DineXpress' most powerful attribute is its stainless steel construction. 14 gauge corner posts sit on a rugged foundation of 14 gauge aluminized steel caster channels with an 18 gauge stainless steel bottom shelf. The top is constructed of 14 gauge stainless as well with body panels of 20 gauge stainless.

Design Flexibility

The modular design of DineXpress allows for complete flexibility. Units can be made to any length up to 114", any height, or any depth, ensuring a perfect fit for your cafeteria or back-of-house setting.

Customization

DineXpress is designed to delight your guests with a large selection of contemporary counter surfaces and panel graphics.

DineXpress product line is compliant to NSF/ANSI Standard 2.

Stainless Steel Construction

DineXpress counters give construction features you won't find anywhere else. Our standard stainless steel top is 14 gauge, while most others offer 16 gauge.

Full Skirt

Hide those casters! Add skirting for a smooth, even, to-the-floor look to greet your customers, without unsightly casters or under the unit paraphernalia. *Optional*

Food Wells

Hot food stays hot with DineXpress standard 1000 watt elements. Wells run wet or dry. Built-in drains allow for easy cleaning.

Adjustable Height

DineXpress units can be made with either manual crank or mechanical lift system to change height on the fly. *Optional*

Interlocking Connector

Bullet interlocks lock units together providing a seamless look while securing your lineup. All units are designed for modular installation - Mix and match cold or hot units to precisely fit the serving line you need.

Tray Slides & Cutting Boards

Choose between 3-bar, solid, ribbed trayslides and cutting boards. Hinged and removable for easy transport and cleaning. Tray Slides comply with American Disabilities Act (ADA) and can be mounted at any height. *Optional*

Protector Guards

Available in a variety of configurations. Cafeteria guards allow you to service customers with ease. Buffet guards allow for self service. *Optional*

Locking Understorage

Store your products securely with locking cabinet doors. *Optional*

Solid Surfaces

Solid Surface counter tops are available in several contemporary finishes giving you the performance of stone and the elegance of marble, with the everyday practicality, durability and easy care stain resistance. *Optional*

Heat Lamps

Units can be fitted with heat lamps to help maintain food temperatures. *Optional*

Domed Heat Lights

Units can be fitted with domed lights. *Optional*

DineXpress - HOT FOOD COUNTERS

HOT FOOD STAYS HOT

Only DineX equipment has the advantage of FoodSafe technology. This ensures that your food is kept out of the DANGER-ZONE. Food spoilage occurs mainly because of rapidly accelerated bacteriological activity within the 40°F-140°F DANGER-ZONE.

Hot food tables hold product at the minimum temperature of 150°F (65°C) required by safety standards.

DineX tray make-up equipment provides maximum food protection and meets sanitation requirements for materials, design, construction and performance of commercial cooking and powered hot food holding; compliant to NSF/ANSI Std 4.

DXP7HF With Built-In Dispensers and solid surface counter

*For item number,
please see back of brochure.*

WELL-BUILT PRACTICALITY

We build products that fit your plan with details that deliver reliable, trouble-free performance and simplify your upkeep and maintenance.

DineXpress Hot Food Counters are available in standard sizes from 2 to 6 wells and offer a wide variety of options and accessories.

- Stainless steel drop down work shelves are available for all configurations
- Intermediate under-shelf and open under counter storage are available for all hot food counters

DineXpress product line is compliant to NSF/ANSI Standard 2.

DXP3ST with Soup Wells and Bowl Dispensers

DineXpress - COLD FOOD COUNTERS

Bloomington Cold Mechanicals (BCM) utilize extra deep wells with recessed, adjustable rails so pans sit beneath the surface of the counter. This allows a blanket of cool air to float above the food, keeping the food fresher, longer.

COLD FOOD UNITS

Bloomington Cold Wells | ANSI/NSF 7

Bloomington units are compliant to NSF/ANSI Standard 7 for design and construction and have been performance tested for the storage of potentially hazardous foods. The performance test criteria is holding food at or below 40°F, without any freezing, for four hours at 86°F ambient room temperature.

DineXpress cold food units are also available in an ice pan version. See page 30 for more details.

COOL BREEZE

An innovative air curtain keeps product at 41°F or less without ice or water. The cascade of cool air maintains correct temperature without drying or freezer burn.

Adjustable adapter bars can be custom configured for many pan sizes and salad bar layouts

DXP5CB with options

DineXpress - COLD FOOD UNITS

FROST TOP™ UNIT

Ideal for parfaits, pastries, gelatins and a variety of other dessert and salad dishes, these units combine excellent display and appeal with efficient cooling.

DineXpress Frost Top with laminated panels and SFTS tray slide

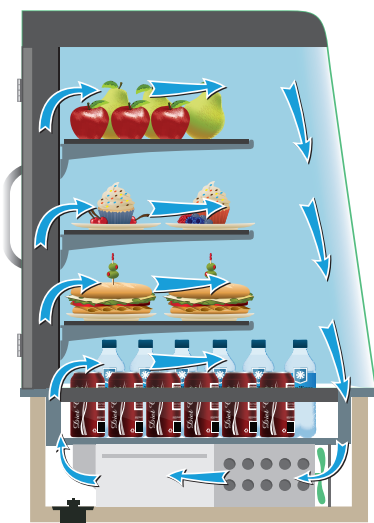

Full Coverage

Our Frost Top gives you the maximum amount of chilled display area by frosting all the way to the edge.

GRAB-N-GO AIR CURTAIN DISPLAY CASE

Exceeds the HACCP Refrigeration Standard. Load your product once and focus on selling.

- Keeps food below 41°F for 24 hours at 75°F ambient temperature with 55% relative humidity
- Never have to unload product
- Low temperature controlled defrost

FoodSafe™

Large Storage Capacity

Adjustable Shelves

LED Lighting

Easy Cleaning

DXPOTR with Powder Coat Finish

DineXpress - STAND AND BEVERAGE URNS

Solid Top and Corner Counters

- Solid Top Counters are available from 32" to 88" in length with a wide choice of optional top surfaces and virtually unlimited selection of panel laminates
- DineXpress Corner Counters are the perfect complement for completing complex counter system layouts
- Corner counters come in 45° and 90° configurations and will interlock with other DineXpress counters
- Optional tray slides and shelves can be added to complete this unit
- These counters come standard with heavy-duty 5" casters (two locking)

Cashier Stand/Solid Top Counters

- Cashier's stand with open storage compartment and optional drawer

Urn Stands/Beverage Counter

- DineXpress Urn Stands are built to hold any configuration of fountain machines, ice makers and coffee bars
- Available with under-counter storage for supplies and custom "bag and box," along with any configuration of tray slides and skirting
- Feature the unique EZ-Connect latching system

ValuXpress - ECONOMICAL MODULAR COUNTERS

Value Line Hot Food Counters

- Available in 2 to 5 well sizes, ValuXpress Hot Food Counters offer a wide variety of options and accessories
- Counters are stationary or mobile with optional heavy-duty 5" casters (two locking)
- Stainless steel drop-shelves are available for all configurations
- Stainless steel protector guards (sneeze guards)
- Over-shelf and under-shelf available
- Easy access electrical service panel
- Compliant to NSF/ANSI Standard 2

Value Line Cold Food Counters (NSF 7)

- Available in 2 to 5 well sizes
- Cold Food Counters are the most versatile and adaptable accessory on the serving line
- Counters are stationary or mobile with optional heavy-duty 5" casters (two locking)
- Stainless drop-shelves and tray slides available for all configurations
- Undershelf standard on all models
- Units feature 9.44" deep wells (NSF 7)
- Counters ensure that food temperatures are always at safe levels
- Over-shelf and under-shelf options available
- Compliant to NSF/ANSI Standard 2

Value Line Solid Top Counters

- ValuXpress Solid Top Counters are available in 30" to 72" in length
- Optional work shelf, tray slide, full-service guard, under-shelf and overhead shelf available
- Compliant to NSF/ANSI Standard 2

WHERE CUSTOM SOLUTIONS ARE STANDARD

Open Understorage

Standard on DineXpress, an open understorage gives complete access to the lower shelf and drain valves without any doors.

Hinged Doors (DXPHD)

Double-paneled stainless steel hinged doors are great for concealing unsightly materials from view. They open 180° for full access to the understorage and include a magnetic door catch. This DXP4HF is shown with a durable powder coated finish.

Sliding Doors (DXPSD)

Our sliding doors are mounted on easy-glide rollers for quick access to storage below.

Refrigerated Base (DXPUCR1)

Refrigerated Storage Compartments are available in unheated or chilled units. 3- and 4-well counters use a UCR-1 single-door model, where 5- and 6-well counters incorporate a DXPUCR2 double door model. DXPUCR bases are available as 120V only.

Heat-In-Base (DXPHIB)

DineXpress Heat-In-Base keeps prepared food in the safety zone (above 140°F) while waiting to be served. The base is thermostatically controlled and holds stainless steel racks with 3" spacing for up to 3 steam table pans per rack.

U-Shaped Bottom

DineXpress units can be ordered with a U-Shape bottom in order to house under-counter equipment while still providing ample work space above. The apron on this Solid Top unit has been deleted to allow for even more space. Shown with DXPA3618268 aluminum rack.

Intermediate Shelf (DXPINT)

Add an intermediate undershelf and instantly double your shelf space. Can also be installed with hinged or sliding doors.

DineXpress - TRAYSLIDES AND CUTTING BOARDS

3 Bar Tray Slide (DXP3BTS)

Our most economical tray slide option is the DXP3BTS. 1" diameter stainless steel bars welded to support brackets make up our 3-Bar Tray Slide. They are mounted on fold-down brackets and include leveling inserts for alignment of multiple slides.

Solid Ribbed Tray Slide (DXPSRTS)

This 14 gauge stainless steel tray slide has 3 embossed ribs to minimize surface scratches and aid in sliding trays. Connector brackets are included to ensure adjacent tray slides in lineups remain level with each other.

Solid, Flat Tray Slide (DXPSFTS)

Identical in construction to the DXPSRTS without the gliding ribs, the DXPSFTS is an economical solution to solid tray slide requirements.

Stainless Cutting Board (DXPSCB)

Our stainless steel cutting board is 8" wide and made of 18 gauge stainless steel. It comes mounted flush with the counter top on drop-down hinges.

Maple Cutting Board (DXPMCB)

The DXPMCB is an 8" wide Maple Cutting Board mounted flush with the counter top and uses identical fold-down brackets as our stainless steel cutting board (DXPSCB). It is gentle on knives while still providing a solid workspace for slicing and dicing.

Plate Shelf

Our 8" wide plate shelf is identical in construction to our DXPSCB but mounted 10" below the counter for extra plate storage.

Mitered Ends on Any Tray Slide or Cutting Board

Mitered ends are perfect for T-shape or L-shape lineups, providing a more cohesive design or a more comfortable transition to the dining area.

Solid Surface Tray Slide

For more upscale designs, our solid surface tray slides can be ordered in any color to match your décor and can be ordered with or without stainless steel glide inserts (shown).

Poly Cutting Board (DXPPCB)

Add a 1/2" thick poly board to our stainless cutting board to improve blade longevity. It is double-sided and easily cleaned.

STANDARD AND CLASSIC PROTECTOR GUARDS

DXPCDD

Our standard double-display protector guard includes 2 acrylic shelves with flip-up guards on the customer side and open access on the operator side. Tempered glass shelves and guards are optional.

DXPCPG

The DXPCPG is Dinex's standard Cafeteria Protector Guard for full-service operations. An 18 gauge stainless steel shelf is standard and flip-up front glass is optional for self-service meals and easier cleaning.

DXPBPG

The DXPBPG is our double-sided buffet guard. It comes standard with an 18 gauge stainless steel shelf and acrylic guards. Flip up guards are optional, as well as tempered glass panels and adjustable height.

DXPOHS

The overhead shelf is identical to our DXPCPG without the acrylic panels. Perfect for extra storage of plates and utensils above the service counter.

DXPBPG-1

This is the single-sided version of our DXPBPG, with the same features and options available.

DXPCDD-C

The DXPCDD-C is our classic-style double display for use with single-sided buffet or cafe lines. Standard features include tempered glass panels and stainless steel frames. For double-sided buffet lines, order the DXPBDD-C.

DXPBPG-1C

The single-sided, classic style buffet protector guard is perfect for self-service lines, but is also appropriate in full-service operations and comes standard with tempered glass all around.

DXPCPG-C

The DXPCPG-C is meant for full-service operations and comes standard with tempered glass and heavy-duty, fully welded stainless steel frames.

DXPBPG-C

Dinex's DXPBPG-C is the perfect solution for your double-sided buffet lineups.

DineXpress - LIGHTS, HEATING LAMPS

LED Lights (DXPLED)

LED Lights are a great way to illuminate the food below while using very little energy.

Fluorescent Lights (DXPFL)

Fluorescent lights provide a nice even glow over the countertop without producing a lot of heat. They are perfect over cold wells like our Bloomington Cold Mechanical or Cool Breeze models, but work just as well over steam tables and solid tops.

Heat Strip (DXPH)

Full-length infrared heat strips are available for an additional heat source from above.

Heat and Lights (DXPHL)

Infrared heaters in combination with incandescent light strips can be added to evenly distribute overhead heat and simultaneously light the serving area.

Bullet-Style Heat Lamps (DXPBL)

Bullet-style heat lamps are a more traditional alternative to full-length heaters. Each lamp provides 125 watts and can be individually switched for maximum flexibility.

Incandescent Light Strip (DXPIL)

Incandescent light strips can be installed on any guard, for any length unit. They come standard with shatter-proof bulbs for added safety.

GUARD SELECTIONS

Hinged Guards

Guards can be hinged for easier cleaning and better access to food. This DXP4HF utilizes a hinged DXPCPG with tempered glass and laminated panels in Red Ellipse - Formica®* 1913. Buffet guards are available hinged as well.

Canopy

Canvas Canopies can be ordered with straight or scalloped edges, with or without lights, and in coordinating colors to match your lineup. A fully welded aluminum frame gives shape to a heavy-duty canvas cover that can be easily removed for cleaning. Add 6" to the length for models with protector guards.

Powder Coated Guards (DXPPPC)

Add some flair to your cafeteria by powder coating the protector guards to coordinate with the base.

* Formica is a registered trademark. Dinetex is not associated in any way with Formica.

DineXpress - COSMETIC OPTIONS

Skirting (DXPSKR)

Our 4-sided stainless steel skirting mounts easily to the underside of the bottom panel and is 5-1/2" tall to conceal the casters or legs. This 60" unit is shown with charcoal gray powder coated skirting with 6" stainless steel legs and hinged doors.

Laminated Panels (DXPFRMA)

Design possibilities are endless when choosing laminated panels. Choose any NSF Approved laminate color or pattern from any manufacturer and our installers will create a look that is truly unique to your operation. This DXP4-ST with hinged doors and stainless steel legs is shown in Wilsonart* #4913 - Eggplant.

**Wilsonart is a registered trademark. DineX is not associated in any way with Wilsonart.*

Powder Coated Panels (DXPPPC)

Choose any color in the spectrum to create the look you want. Paint the entire unit or just the panels for a nice contrast with the stainless steel. It's up to you!

LED Tray Slides

Add drama with LED lights under the tray slides. It enhances the finish, whether fiberglass, stainless or powder coated and is perfect for highlighting logos or other graphics.

Adapter Bars

Adapter bars give you the freedom to use various size pans simultaneously in your cold wells. They are easily removed for cleaning and can be rearranged for different displays.

Graphics/Logos

Vinyl Graphics add another dimension to your design. Add logos, stripes, photos or a sexy swoosh to enhance the look. "Reflections" units can even be completely wrapped with vinyl graphics for a truly unique expression.

Solid Surface Countertops

Beautiful solid surface countertops are available in hundreds of colors and patterns to enhance the design and add an element of sophistication to the buffet experience. Contact DineX for the most current color offerings and trends.

False Front

False fronts are a great way of incorporating other miscellaneous equipment into your lineup without interrupting the design integrity on the customer side.

Backsplash

Backsplashes can be added to any DineXpress unit and are available in 4", 5" and 6" heights. This DineXpress DXP5-CU is shown with a 4" backsplash, sliding doors and 2-1/2" round cutout with bushing for cords and wires.

Filler Strips (DXPFLP)

For a seamless built-in look, add filler strips. Simple magnetic strips mount between the units to create the illusion of one continuous counter. They come standard in stainless steel but may also be powder coated to match.

DineXpress - CONVENIENCE OPTIONS

Duplex Outlet (DXPDOUT)

Computers, monitors, printers, bar code scanners, the list goes on and on. They all need to be plugged in. Gain more power by adding a duplex outlet to each unit. They free up valuable wall/floor outlets and eliminate the need for extension cords that are potential trip hazards.

J-Channel

Having all of the cords under a lineup can be an unsightly mess and difficult to clean around. J-Channel gets those cords off the floor and out of the way so you can spend less time cleaning and more time focusing on the food.

Stainless Steel Legs (DXPSSL)

6" stainless steel legs are available in lieu of casters. They include adjustable feet to help keep things level on uneven floors. Flanged feet with floor-mounting holes are also available for more permanent installations.

Polyurethane Casters

Polyurethane casters are a great alternative to our standard casters. They offer a high weight capacity, are non-marking and easy-rolling. Other benefits include noise reduction and corrosion resistance.

Adjustable Height (DXPAHM)

An innovative way to serve a wide range of ages is to include adjustable height counters in your lineup. Popular with elementary schools, a simple turn of a handle can raise a table from a petite height of 30" to any increment up to 36". electric models are also available for easy transformation at the push of a button.

Salad Bar Template (DXPSBT)

Available for cold mechanicals, "Bloomington" Cold Wells, and Cool Breeze models, the DXPSBT can be configured to hold any combination of bowls and pans to keep your salad bar organized and clean.

Tubular Foot Rest (DXPTFR)

The stainless steel tubular foot rest is available as an option on DineXpress.

Removable Undershelf (DXPRUS)

Removable bottom panels can be included to give you the choice of having a full bottom shelf or an open bottom, allowing complete flexibility in your storage options.

DineXpress - CONVENIENCE OPTIONS

Load Center (DXPICW)

Individual items in a lineup can be inter-connected by extending the cord to a single power source located in the base of a centralized unit.

Door Locks

Locks can be added to hinged or sliding doors to keep things safe and secure.

Fill Faucet

Fill faucets simplify the task of filling steam wells. Requires 1/2" NPT hot water connection.

Autofill

Ensure your water is always at peak level in your steam tables. Autofill measures the level of water in the steam table and automatically fills the wells accordingly.

Bread Shelf (DXPSBS)

The SBS is an 18" wide stainless steel shelf mounted on drop-down hinges on either the left or right side of any unit. Perfect for mobile units that require occasional extra work surface. Just drop it down when you are on the move.

Dual-Use Tops (DXPDUT)

Our 1" recessed tops allow you to use 18" x 26" sheet pans over the existing wells without the use of adapter collars. It helps keep trays in their place and increases display possibilities. Full-size sheet pan capacity will be one less than the steam pan capacity of the unit.

Cup and Plate Dispensers

Units can be modified to include drop-in cup, tray or plate dispensers or soup wells.

Individual Drains (DXPIND)

Fill or drain each well individually as needed without affecting the other wells.

THREE DISTINCT WAYS TO MAKE IT YOUR OWN

3. SELECT YOUR DINEXPRESS FINISH

STAINLESS STEEL - STANDARD

The extreme durability and easy cleaning of stainless steel makes it the first choice for strict hygiene conditions such as, hospitals, kitchens, and other food processing environments, while providing a modern and attractive appearance.

LAMINATE

Laminate offers a wide range of patterns and colors. Surfaces can mimic everything from wood grains and stone to subtle textures and solids. Laminate is made of plastic-coated synthetics with a smooth surface that's easy to clean.

Model #	Description
FRMA	Formica Laminate without Doors
FRMAD	Formica Laminate with Doors

PIZZAZZ POWDER COAT

Color selection is virtually unlimited with flat, satin, gloss, high gloss, metallic, candies, clear, iridescent, fluorescent, wrinkle, hammer tone and glitter finishes available. Powder coated surfaces are resistant to chipping, scratching, fading and wearing.
