Versatile. Precise. Delicious!

- The IRM190 is perfect for professional results with roasts, meat and poultry cooked in conventional or microwave ovens, on the grill, rotisserie, or in smoke ovens.
- This INSTA-READ® thermometer is a precision instrument, yet is rugged and durable. Use it for quick, accurate readings after food has been removed from the microwave oven – or leave IRM190 in food when cooking in conventional ovens. The slender stainless steel stem penetrates meat easily, and minimizes the loss of juices.
- Temperature and recalibration guides are also available at www.cdn-timeandtemp.com

Note: Clean the thermometer stem before each use.

Important: The glass lens in this thermometer is not designed to withstand the elevated temperature under a broiler or in some covered barbecue grills. Do not leave the IRM190 in food in these cases.

Important: DO NOT IMMERSE IN WATER. HAND WASH AND DRY.

Tip: Meat should be allowed to “rest” for 10 to 15 minutes after it is removed from oven. This allows time for the meat’s internal temperature to stabilize and the juices to redistribute. This will result in a roast that is both juicier and easier to carve.

Temperature sensor is between “dimple” and tip of stem. For best accuracy, stem should be inserted into food to dimple or higher.

It's Safe to Bite When the Temperature's Right!™
