

# ADVANCE YOUR SUSTAINABILITY EFFORTS

TO-GO DINING SOLUTIONS FOR THE  
FORWARD-THINKING WORKPLACE

As a forward-thinking industry leader, you know sustainability efforts aimed at enhancing our world for future generations are imperative to the overall health and growth of your company. No doubt you're already involved in a number of eco-friendly programs like reducing energy consumption and carbon footprints.

## **But what about your dining program?**

G.E.T. created a complete reusable to-go dining program with a sharp focus on advancing and rounding out your sustainability efforts within your company. When you partner with us, you'll enjoy budget-savings and increased sustainability in one practical program.

# Eco-Takeouts<sup>®</sup>

## THE ORIGINAL REUSABLE TO-GO CONTAINER

Eco-Takeouts<sup>®</sup> can eliminate single-use disposables while saving you money.

Depending on your operational costs and volumes, you can reach a breakeven point in as little as a few months.

Save up to **46%** annually by switching from disposables to Eco-Takeouts<sup>®</sup>\*

### How do you save? Let's assume...

- 261,000 meals/year
- \$23,490/year spent on disposables
- \$21,000 for first year investment of 3,000 Eco-Takeouts<sup>®</sup>
- \$4,200 for second year investment of Eco-Takeouts<sup>®</sup> (maximum average annual replacement rate of 20%)

Two-year investment of disposables = \$46,980

Two-year investment of Eco-Takeouts<sup>®</sup> = \$25,200

**\$21,780, or 46%, total savings** over the first two years by switching to Eco-Takeouts<sup>®</sup>

\*Calculations based on 1,000 meals/day over 261 business days with an average cost of \$0.09 for disposable containers and \$7 for an Eco-Takeouts<sup>®</sup> container, assuming a ratio of 3 containers per person served (serve+wash+rest) and a maximum of 20% annual replacement rate for Eco-Takeouts<sup>®</sup> containers.

# How do Eco-Takeouts® work?

## Popular Eco-Takeouts® Reusability Systems

### Exchange System

Provide diners with an Eco-Takeouts® container for a small fee. Diners then exchange their used container for a clean one at their next meal. Used containers are sanitized like any other dinnerware.

### Token System

You can issue diners tokens or swipe their dining cards to confirm a diner has returned their Eco-Takeouts®. If a diner loses or damages a container, you may choose to charge them a small fee for a replacement. It's up to you.

### Honor System

Give diners a free Eco-Takeouts® container and encourage them to return used containers as part of your sustainable dining program. Replace lost, forgotten or damaged containers for free.

# Eco-Takeouts® Features

- ✓ Commercial dishwasher safe
- ✓ Microwave safe for reheating (one- to two-minute intervals)
- ✓ Durable, stackable and leak-resistant
- ✓ Available in a range of shapes and sizes, including soup containers, accommodating a wide variety of menu options and portion control management
- ✓ BPA-free, non toxic plastic

# Evolution™

## THE INNOVATIVE REUSABLE TO-GO FOOD PLATE COVER & LIDS

### The patent-pending Evolution™ system provides:

- ✓ An easy way to take food from the cafeteria to the office. An improvement over flimsy to-go containers, creating a better eating experience
- ✓ Cross-functionality of dine-in and to-go wares
  - + Simply add an Evolution™ lid or cover to your dine-in plates to turn them into to-go plates
  - + Reduce operational complexity and your overall inventory of dinnerware
- ✓ Leak-resistance and a secure fit with silicone grips
- ✓ A divot on each plate cover where you can securely nest side dish bowls
- ✓ Microwave safe for reheating (one- to two-minute intervals)
- ✓ Commercial dishwasher safe, BPA-free, non toxic material
- ✓ Recyclable #5
