

# HOSHIZAKI HDI WATER FILTRATION

## Exceptional Performance & Value

Model: \_\_\_\_\_

Project: \_\_\_\_\_

Qty: \_\_\_\_\_

**HDI-11**  
15,000 gal  
1.5 GPM

**HDI-12**  
30,000 gal  
3 GPM

Available with 5-micron sediment pre-filter

**HDI-22P**  
60,000 gal  
6 GPM

Available with 5-micron sediment pre-filter

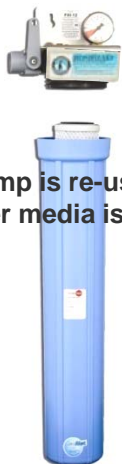

**HDI-22**

**HDI-22P+**

Patented IsoNet® scale and corrosion inhibitor technology.

The sump is re-used. Only the filter media is replaced.

## Why Water Filtration Matters

- 70% of ice machine service problems are water-related.
- Scale increases energy consumption and decreases ice production.
- Off taste and odor can ruin beverages.
- Makes routine maintenance simple and less expensive.
- Avoiding one emergency service call can pay for your system.
- Your ice machine stays cleaner, runs better and lasts longer.

- ✓ Replacement cartridge cost is much less than quick-connect cartridges.
- ✓ Generates less waste – No discarding of aluminum or plastic filter housings.

Hoshizaki HDI Filtration Systems are Tested and Certified under ANSI/NSF Standard 42 for Particulate Reduction and for Chlorine Taste & Odor Reduction.

Mfg. by OptiPure for Hoshizaki America, Inc.

\*HDI-22 and HDI-22P+ include built-in 5 micron sediment prefilter.

HDI system recommendations are based upon equipment flow rate and water usage requirements for a six month period between filter changes.
