

INNOVATION THAT FITS LIKE A GLOVE.

San Jamar® is proud of our commitment to provide hand safety products that meet the challenges of today's kitchen environments. Each mitt is constructed using the finest materials and designed to address the challenges you face everyday. Durability, comfort and the ultimate protection combine to bring innovation to your fingertips.

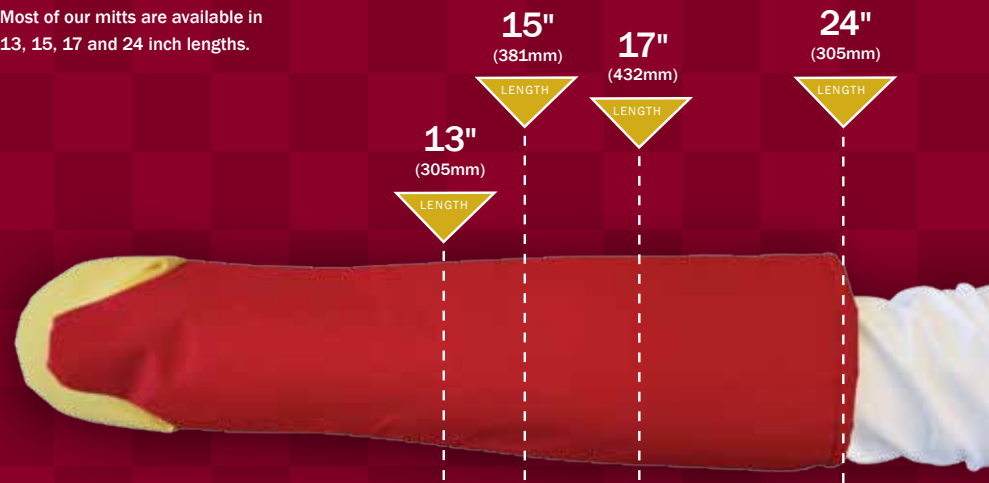

MATERIALS THAT MAKE A REAL DIFFERENCE

KEVLAR®	Offering extreme heat and cut protection, this fiber provides superior dexterity and flexibility with it's light-weight and durable construction.
NEOPRENE	Our Neoprene oven mitts are made from dense, but flexible closed cell material and offers a non-slip grip.
NITRILE	Nitrile is a synthetic, latex-free rubber. It has excellent tear resistance and offers superior protection to most kitchen chemicals.
NOMEX®	Flame and heat resistant, our innovative Nomex® material ensures outstanding protection over extended periods of time.
SILICONE	Our Silicone Oven Mitt line is designed to withstand cold and hot temperatures ranging from 0 °F up to 400 °F. They feature a quilted cotton design and a protective non-stick silicone coating.
TERRY CLOTH	Our heavy duty terry cloth offers heat protection up to 500 °F. Our SB (steam barrier) liner provides ultimate steam protection.

Kevlar® and Nomex® are registered trademarks of Dupont.

SIZING THAT MATTERS

Most of our mitts are available in 13, 15, 17 and 24 inch lengths.

When it comes to **hand protection** San Jamar® provides the **broadest selection** of quality hand safety products. From **extreme heat and cold protection** to **cut protection** and utility gloves, San Jamar® has **the right mitt/glove for the job.**
