Compact Ice Machines

Perfectly sized for smaller settings

The SM-50 compact ice machine combines design and performance. The compact design accommodates the most intimate settings while the performance meets professional standards. Designed to be installed into standard cabinet dimensions or stand alone with stainless top and sides standard. Individual cubes with unique octagon shape provide maximum cooling with 98% ice to water ratio. Easily accessible control panel provides functionality with automatic ice making mode, delay start option, patented cleaning and sanitizing, and water filter replacement warning light.

Daily ice production up to 53 lbs. of ice.

Patented cleaning and sanitizing technology

To simplify maintenance, all Manitowoc ice cube machines have an exclusive, patented technology that cleans or sanitizes the ice machine's water-distribution system in just 24 minutes. Standard on all ice machines, this technically reduces cleaning effort to simply flipping a switch and pouring in a few ounces of cleaner or sanitizer.

Nugget Ice

Great things happen when you combine the popularity of nugget ice with the quality and reliability of Manitowoc. Manitowoc's nugget ice provides a softer, chewable texture while still providing maximum cooling effect. Small nugget ice is approximately 3/10" X 3/10" X 1/2". Perfect for nurses stations, physical therapy areas, break rooms, cafeterias and conference rooms. Ice and/or water is easily dispensed into cups, pitchers or ice bags for every need.

Manitowoc countertop nugget ice makers and dispensers deliver the largest daily ice production levels and storage capacities within the smallest footprint. Dispensing functions include: ice only, water only, or ice and water. Choose lever activation or touchless dispensing. Features include a lighted dispensing chute, a 10.5" dispense clearance and a large drain pan. Two storage capacities available in same small footprint—SN-12 and SN-20.

Produces up to 325 lbs. of ice daily. For larger nugget ice production or storage needs, see Manitowoc's assortment of modular nugget machines and bins

Recovery rooms

Cafeterias

Flake Ice

Manitowoc offers traditional flake ice which is small, soft bits of ice used for cold therapy, hand scooping into drinks and food/beverage display and cooling. Flake ice easily forms around objects making it ideal for ice packs and maximum cold contact around sore or injured areas.

Flake ice machine models are designed for reliability and easy serviceability. The stainless steel evaporator and auger provide enhanced durability and life. Evaporator components are easy to inspect or maintain. Manitowoc flake ice provides a 73% ice-to-water ratio which prevents the ice from clinging to the items it cools.

No matter what type of application you have for flake ice, whether it's a salad bar in the cafeteria or ice packs during physical therapy, Manitowoc has the flake ice machine to serve your needs.

Daily ice production levels from 182 to 2545 lbs. of ice.

Manitowoc's exclusive Guardian system is patented technology that releases chlorine dioxide on a controlled basis to inhibit the growth of bacteria and fungi that form slime and cause odors in the food zone of ice machines. Available for most models.

Cube Ice

Designed to run whisper-quiet

At Manitowoc Ice, we know how important a quiet, relaxing atmosphere is to your business. Manitowoc QuietQube® ice machines are up to **75% quieter** than a self-contained or standard remote ice machine...the quietest ever made.

Our patented CVD technology® uses cool vapor rather than hot gas to harvest ice. It not only makes QuietQube® ice machines the quietest ever; it makes them more reliable, more efficient, and provides high levels of ice production too. So when quiet operation is essential to creating a tranquil setting, there's only one choice: The pioneer of QuietQube® technology, Manitowoc Ice.

Daily ice production levels from 650 to 2910 lbs. of ice.

61 models from Manitowoc Ice are ENERGY STAR® rated. S-Series QuietQube meets CEE Tier 1 energy and water use standards in almost every category. In some states that may mean a cash rebate!

Since its inception in 1964, Manitowoc Ice continues to be a powerful force in the foodservice equipment industry. The Manitowoc Ice team is committed to providing products that not only satisfy customer needs but also add value to the equipment investment by reducing costs and emphasizing food safety.

Manitowoc® Ice has received, for the ninth consecutive year, the designation of “Best in Class” in the Ice Makers category by foodservice equipment dealers, consultants and operators in a survey sponsored by Foodservice Equipment and Supplies magazine.

Innovation, customer support, and world-class service have enabled Manitowoc Ice to become America’s #1 selling brand of ice machines.
