

MetroMax® i Drying Rack
with Advanced Water Capture

Take dish room safety to the max.

Metro® drying solutions put your customer & your employee safety first.

Eliminate wet nesting and minimize wet, slippery floors with MetroMax i Drying Racks. Designed to promote food safety, the open-air design maximizes airflow for faster, safer drying while the smart new water capture system minimizes wet dangerous, slippery floors.

Advanced Water Capture

Wet, dangerous floors in a dish room can be hazardous to kitchen employees. Our Advanced Water Capture System minimizes the effect from dripping pots, pans & trays by containing and funneling water into an easy-to-empty standard steam pan.

Water collects in a standard steam pan.

Easy-to-install adjustable system fits 24" x 36" and 24" x 48" MetroMax i shelf frames.

Water safety.

Open-Air Design

Bacteria build-up between nested items can degrade food quality during preparation & storage. Proper air circulation helps prevent bacteria growth.

DROP-IN RACKS HOLD

Pots, Pans, Utensils, Odd or Large Items

TRAY & PAN RACKS HOLD

Trays, Cutting Boards, 2.5" Pans

Utility.

Accessories provide the needed function to accommodate large utensils and deeper pans.

We put space to work.
