The ReliaGuard®

Commercial Gas Connector

The Dormont® ReliaGuard® is a moveable-grade gas connector specifically engineered for caster-mounted commercial cooking equipment. The ReliaGuard includes a gray PVC coating and rotational end fittings.

The fuel gas codes require the use of an ANSI Z21.69/CSA 6.16 moveable gas connector with all appliances that may or may not utilize casters and, under normal use, are moved on a regular basis for service, positioning or area cleanliness.

From the trusted Dormont brand, ReliaGuard is designed for use with moveable equipment for ease of cleaning and repair. The ReliaGuard is composed of a 304 stainless steel corrugated tube covered with a tight weave stainless steel braid. The outside, composed of a gray PVC coating, is flame-resistant and can withstand temperatures up to 350°F. The end fittings of the connector allow for a 360° rotation, dramatically reducing stress at both hose ends. The ReliaGuard gas connector is flexible, durable, and corrosion resistant, making it the perfect solution to every commercial kitchen's gas connection needs.

Rotation technology reduces stress on both ends of the hose

Stainless Steel Braid
Tight-weave braid prevents corrugations from stretching as equipment is moved

Stainless Steel Construction
Heavy-duty, flexible, corrugated 304 stainless steel tubing

PVC Coating

Standard Snap
• Standard Snap quick disconnect fitting

SwivelGuard™
• Reduces stress on connector
• Increases kitchen aisle space by allowing connector to be positioned closer to the wall

Restraining Cable
• Prevents transmission of strain to connector
• Provided 1' shorter than the gas connector
