

Pacotizing® beaker assortment

Indispensable & cost-effective

THE PACOJET DIFFERENCE – WE PACOTIZE®.

A worthwhile investment – More supplies at hand, higher added value

The **original high-quality chrome steel pacotizing® beaker is central** to the pacotizing® process:

- Unit of measurement for all Pacojet recipes – essential for proper freezing and key to producing results of exceptional Pacojet quality
- Specific construction – guarantees perfect precision when pacotizing®

The **proven-durable chrome steel pacotizing® beaker** with the synthetic protective outer beaker is included with the delivery contents of all Pacojet systems (also available as an accessory).

A sufficient supply of chrome steel pacotizing® beakers enables efficient use of the Pacojet while expanding the variety of recipe options.

Recommendation: at least 20 chrome steel pacotizing® beakers as basic equipment for intensive daily use.

NEW

New: Pacojet has developed the **transparent synthetic pacotizing® beaker** with a fitted chrome steel protective outer beaker:

- A cost-effective extension of the pacotizing® beaker range
- Ideal when a large quantity of beakers is needed to cover peak times in the kitchen

Recommendation: a large supply of synthetic pacotizing® beakers (beyond the basic equipment of chrome steel beakers) to meet the needs of catering or banquet services.

Calculate your ideal pacotizing® beaker requirements at:

	Combi steamer	well suited	up to 3 hours at 90°C
	Microwave	unsuitable	unsuitable
	Dishwasher	dishwasher safe	dishwasher safe up to 90°C

Always in tandem – Pacotizing® and protective outer beaker

The protective outer beaker fastens the pacotizing® beaker to the Pacojet. Please note that chrome steel pacotizing® beakers may only be used in combination with synthetic protective outer beakers and synthetic pacotizing® beakers may only be used with chrome steel protective outer beakers. Please read the corresponding instructions on the respective protective outer beaker carefully.

Synthetic protective outer beaker	✓	Chrome steel pacotizing® beaker
	✗	Synthetic pacotizing® beaker

RULE OF THUMB: Beakers of the same material must not touch each other!

Chrome steel protective outer beaker	✓	Synthetic pacotizing® beaker
	✗	Chrome steel pacotizing® beaker

Proper use of the pacotizing® beakers ensures consistent quality of results. Improper use due to the subsequent insertion of frozen contents into the pacotizing® beaker can damage the Pacojet machine.

Every Pacojet system comes with chrome steel pacotizing® beakers and a compatible synthetic protective outer beaker. If you would also like to work with synthetic pacotizing® beakers, you can order the starter kit incl. a chrome steel protective outer beaker.

Standard delivery contents with chrome steel pacotizing® beakers
