

SkyLine Combi Oven Installation

Once you've selected the SkyLine combination oven that best fits your needs, it's important to ensure optimal performance and lifetime by making sure it's properly installed and maintained.

Preparing for Installation

It is the customer's responsibility to ensure the following requirements are met prior to installation of a SkyLine combination oven:

- Necessary permitting and licensing
- Delivery of oven to within 5' of final location
- Procurement of the appropriate Electrolux Professional installation kit and any additional materials if needed.
- All utilities and connections are sized appropriately for the selected Skyline combination oven, are within 3' (gas) or 5' (electric) of the oven location and meet all local codes.
- A floor drain is located within 3' of the oven location and not directly under the oven.
- Appropriate exhaust ventilation to meet local regulations and standards. Minimum height clearance for oven under hood.
- Floor is level and even.
- Water quality meets oven requirements per the spec sheet. Procure an Electrolux Professional water treatment system if needed.
- Water connections are appropriate for the oven and supply meets minimum dynamic and maximum static pressure requirements.
- Proper clearances from walls, neighboring equipment, and heat sources per the instructions

SkyLine Combi Oven Installation Process

Factory Site Inspection *sold separately - ASE500

Electrolux Professional offers a Factory Site Inspection service to help ensure the above conditions have been met and the site is ready for your new oven to be installed.

Factory Installation *sold separately - ASE000

Electrolux Professional offers Factory Installation services and can arrange for installation of your new oven(s) by factory trained and authorized installers. This ensures that your new oven(s) are installed per the manufacturer's instructions and are tested to confirm proper operation.

Included in Factory Installation:

- Travel within 50 miles of installer, 100 miles round trip
- Uncrating of purchased equipment
- Placement and leveling of unit
- Connection to existing utilities within 3' (gas) or 5' (electric and water)
- Start-up to ensure equipment is working properly and initiate the warranty period

Not Included in Factory Installation:

- Travel over 50 miles one way, 100 miles round trip
- Overtime labor or travel - before 8am or after 5pm M-F or Weekends/Holidays
- Delivery to end user location
- Positioning of unit more than 5' to final location
- Installation supplies (install kit sold separately)
- Removal of packing material and/or old equipment from site
- Licensing and permits
- Any utility upgrades or modifications required to meet specification of purchased equipment.

SkyLine Combi Oven Installation

Factory Startup *included with oven purchase

Every Electrolux Professional SkyLine combination oven includes our Factory Startup service performed by a factory trained and authorized service agent. It's critical to schedule this startup as soon as the oven is installed to ensure proper operation, update software, and activate your warranty. Your dealer or manufacturer's representative can schedule your free startup by emailing a completed Paid Installation Information form to profconnect@electroluxprofessional.com

Chef Training *included with oven purchase

Your Electrolux Professional SkyLine combination oven purchase includes on-site training with a certified Electrolux Professional chef to cover operation, how to purchase chemicals, preventative maintenance, and assist with setting up recipes. Your dealer or manufacturer's representative can schedule your free Chef Training after the Factory Startup is complete here:

Ordering Cleaning Chemicals

Proper cleaning is essential to maintaining your oven. Be sure to have a supply of cleaning chemicals on hand prior to operation. Cleaning supplies are available for order on PartsTown.com
