

# Re:Collection

## Bring an eco-friendly vibe into your kitchen

The recycled fabric from **plastic bottles** nourishes your goals to make a positive global impact.

The new line of sustainable products from Chef Works brings a forward-thinking approach to culinary and hospitality apparel. Featuring six products, the Re:Collection uses REPREEVE® Polyester, which was developed by Unifi®, the No. 1 producer of recycled polyester. This process converts plastic bottles into sustainable performance fabrics.

It's a chance to re-use materials, re-source fabrics and re-imagine the way we do business.
