

GENERATION FOUR

The art and science of brewing. Simply coffee perfection.

Introducing Curtis G4. An acceleration of design and function that perfects coffee brewing, cup after delicious cup. An instinctive touch screen, icon-driven interface provides users with training, programming and seamless operation.

It's brewing science at its best... only from Curtis.

Curtis[®]

GENERATION FOUR

TOUCH SCREEN PROGRAMMING/OPERATION

READY TO BREW

Individualized buttons for each size/brewing head plus warmer controls.

BREWING

Animated illustration shows brewing in process and time remaining.

MAIN MENU

One button access to key setting screens.

CONTROL SETTINGS 1

Quick navigation to temperature, warmers, quality timers, etc.

CONTROL SETTINGS 2

The G4 Features exclusive self diagnostics to ensure perfect brewing

MODEL SELECT

G4 module is easily adaptable to multiple Curtis brewing systems. Simplifies inventory.

RECIPES

One-touch setting of brew recipes for standard coffee types.

FINE TUNING

Pre-infusion, Pulse, Temperature allow operator to fine tune signature flavor.

BREW BY VOLUME

Set volume levels with simple START/STOP buttons; Set multiple brewers with convenient BREW BY TIME.

SELF DIAGNOSTICS

Continuous monitoring and testing of all key functions. Status is clearly identified by color: Green = OK; Red = Condition Exists

SCALE WARNING/ERROR

Unique probe sensor indicates heavy lime condition for preventative maintenance.

ACCESS CODE

Keeps unauthorized users away from program settings. Can be customized.

FEATURES

With a wide selection of features and programming flexibility, Curtis has taken coffee brewing technology to new heights with the Generation Four Gemini® Brewing System, a true leading-edge machine.

The Gold Cup™

GEMINI® G4

ThermoPro™ G4

GEMINI® G4 with IF

- **Large, 4.3" touch screen.**
- **Icon-driven interface** – streamlines and simplifies operation.
- **On-screen instructions** – provide fast, intuitive training and reduce service calls.
- **Real time feedback** – of the brewing process helps eliminate user error.
- **Built-in self diagnostic system** – alerts operator of system failure and when the machine is in need of preventative maintenance.
- **Advanced Mineral Deposit Warning*** – advises the "health" of tank probe. Alerts operator if excessive lime/scale is present on probe. (*PAT. PEND.)
- **Energy saving mode** – is easily customized allowing unique setting for specific operator needs and applications.
- **Patented G4 digital controller** – can be used in multiple Curtis brewing systems, reducing parts inventory.
