

Heating things up can  
slow things down without  
the right hand protection.

# Don't let your productivity get burned.

When you're working in a fast paced kitchen environment, speed is key. You might reach for the nearest towel or just use an apron to grab a hot pan or bread out of the oven, or flip some veggies on the stove. It's a quick solution now, but not using the right protection can hurt you in the long run; burns and blisters can take cooks out of the kitchen for weeks. Providing the right tools to prevent heat related accidents is the best way to go.

San Jamar offers a variety of innovative heat protection solutions. From flame resistant hot pads to versatile pan grabbers, you'll find the product that will keep your hands safe while maintaining the fast pace you need.
