**BETTER
PERFORMANCE**

V-Core™ Cooling Technology is a highly advanced refrigeration system that delivers exceptional food quality and storage consistency. It combines several intelligent features into a single system to optimize performance.

PROVEN IN LAB TESTING

ENERGY CONSUMPTION DAILY KWH USAGE OVER A 1-MONTH SPAN

The competitor's unit uses an average of 6.2Kwh p/day, whereas the Victory unit with V-Core system only uses 3.92Kwh p/day on average. It's a **35% increase** in performance, which you can really see over time, as illustrated in the chart, which shows that in just a month's time, the energy savings really adds up.
