- Add an additional 20% for Alaska, Hawaii, & New York City.
- Installation of Network LAN cables.
- Equipment ventilation requirements including but not limited to exhaust hoods, duct work.

Removal of Existing Equipment:

- Customer must have existing equipment removed prior to arrival.

Optional Service Offered*:

**If any of the offered services below are required, please reach out to the local Hobart Service Branch for a detailed installation quote.*

- Pre-Site Survey (**select Pre-Site Survey option if required**).
- Extended travel beyond 100-mile radius of the installing Hobart Service Branch.

Installation Basic Requirements including but not limited to the selected equipment purchased:

- New equipment must match the location's current utilities: electrical, network, gas lines, plumbing/drains, and venting.
- All existing electrical, water, gas and drain connection types within 5 feet of unit (**It is the responsibility of the customer to ensure that all existing utility connections meet local codes and are sized correctly**).
- Equipment installed under a commercial ventilation hood that meets exhaust requirements per local code.
- Equipment installed on level floor, note: **Units installed with casters must be on level floor**.
- The equipment's final location must meet all minimum clearances for service and clearances from other heat sources.

For detailed equipment utility requirements please refer to the Vulcan equipment specification document.

Additional Items:

- If there are any unusual circumstances a site visit is required, and a firm quotation will be provided for all necessary work. Unusual circumstances and exceptions to pricing outlined would include but are not limited to restricted entryways, obstacles, architectural access restrictions, non-standard installation hours, unusual vehicle restrictions and local ordinances, etc.
- Any quotes are conditional upon your acceptance of Hobart Service terms and conditions attached and those at <https://www.hobartcorp.com/service-terms>.

Hobart may conduct a site survey at customer's facility, such site surveys are intended to identify problems which can be readily identified through reasonable visual inspection. However, the customer is solely responsible for the state of their facility and site including electrical and plumbing lines. During a site survey, Hobart is under no obligation to excavate, move equipment, or otherwise disassemble or remove covers, fascia, sconces, or the like. Should problems or defects be identified during the site survey or Hobart's services, customer shall remedy such problems at its own cost before Hobart is required to continue performing the services.
