404A/134A COMPRESSOR WARRANTY

The five year compressor warranty detailed above will be voided if the following procedure is not carefully adhered to:

1. This system contains R404A or R134A refrigerant and polyol ester lubricant. The polyol ester lubricant has rapid moisture absorbing qualities. If long exposure to ambient conditions occur, the lubricant must be removed and replaced with new lubricant. Failure to comply with recommended lubricant specification will void the compressor warranty.
2. Drier replacement is very important and must be changed when a system is opened for servicing. A drier using XH-9 desiccant or an exact replacement solid core drier must be used. The new drier must also be the same capacity as the drier being replaced.
3. Micron level vacuums must be achieved to insure low moisture levels in the system. 500 microns or lower must be obtained.
4. All Compressor replacements must be obtained through BLUE AIR's warranty department unless BLUE AIR waives this requirement in writing and at its sole discretion. Failure to comply with this requirement will void the compressor warranty.

In case of compressor replacement under warranty, either compressor or compressor tag must be returned to Blue Air along with the above listed information. All claims must be reported to Blue Air within one (1) year of occurrence. Warranty will not be effective unless the warranty card is returned to Blue Air or registered online with Blue Air within twelve (12) days of installation.
