

Digital Drawer Power

Our Heater Proofer Line is getting a new digital power drawer. Our redesigned power drawer offers improved operating performance at virtually the same price!

LED Lights to show necessary temperatures for heating & proofing have been reached

LED Lights to indicate the Heater Proofer is in use.

Circuit breaker to provide over current protection to the entire heater proofer

DESIGN

Our goal was to offer our customers a heater proofer drawer that expanded on an already proven drawer designed with additional features and benefits.

Making the change...

Our Digital Heater Proofer drawer will replace our current analog drawer in two of our existing units. It's a change full of added features and benefits:

- The addition of the circuit breaker ensures over current protection to the entire heater proofer.
- Digital thermometer provides more accurate calibrations.
- Easy to use digital control.
- Separate read out displays clearly show settings for humidity and temperature.
- Lights to indicate low water level and low temperature.

PERFORMANCE

Separate digital display for heating mode and proofing mode, supported by a digital thermometer, which provides accurate and precise temperature calibrations.

Beginning January 15, 2018, the following units will be available with the new digital drawers:

New Model# **NHPL-1825-UNC-DGT** Universal Runner HP
List Price: \$4,359
Discontinued Model# **NHPL-1825-UNC**

New Model# **INHPL-1836C-DGT** Insulated HP
List Price: \$4,357
Discontinued Model# **INHPL-1836C**

QUESTIONS

We are confident that our new digital drawer will be a welcome change for you and your customers, but if you have any questions regarding the new drawer please do not hesitate to contact us at 800.444.3595 or customerservice141@winholt.com

The NHP-PD-DGT digital drawer is available for sale separately and can be easily switched into any Winholt cabinet you have. Great option if a replacement drawer is needed! List Price \$1,600

All orders already placed for the NHPL-1825-UNC and INHPL-1836C will be honored and shipped with the current analog drawer.
