

VP400

Double Chamber Vacuum Sealer

DOUBLE

CHAMBER

Operates on 110 Volts!

VACMASTER® VP400

The New VacMaster® VP400 Double Chamber Vacuum Sealer was designed to boost packaging operations without sacrificing floor space. To make this double chamber vacuum sealer even more accessible, the VP400 operates on 110 Volts. Features include two 16-inch seal bars located in each chamber, providing the option of sealing four large chamber pouches at once or doubling up of smaller bags for maximum efficiency. Built with a commercial-grade, 1.5 hp oil pump to deliver a quality vacuum in 20-30 seconds. A table height, flat deck design for increased production and speedy operation. 4-inch casters allow the VP400 to be moved easily for cleaning or maintenance. Constructed of stainless steel with fully skirted access panels to promote easy sanitation. The easy to use control panel lets you set the vacuum, seal and cool time. Bag locks on the seal bar gasket reduce bag movement during busy production cycles. The VP400 is ideal for small to medium volume processors needing to package larger size products.
