### Product Features:

ADA compliant design	32" height allows easy installation under lower ADA compliant counters
Built-in capable	Front-breathing design lets you make the best use of space by installing your appliance under the counter
Commercially approved	Meets ETL-S to NSF-7 standards for use in commercial settings
+2°C to +8°C operation	Designed to safely store vaccines, select pharmaceuticals, and other materials with strict temperature requirements
External temperature readout	Includes continuous display of the current interior and high/low temperature, and can be switched from Celsius to Fahrenheit at the touch of a button
Buffered temperature probe	Thermometer probe is encased in a glycol-filled bottle and stored in a fixed box on the left wall of the inner cabinet. This is the ideal way to produce temperature readings closest to stored contents, as recommended by the CDC and VFC's guidelines
3" thick door	Improved insulation for an efficient performance; NOTE: due to the oversized design, the door does open in its own radius. If installing this freezer against a wall, please see our drawings to ensure adequate space
Flat door liner	Interior design conforms to CDC guidelines to ensure stable conditions for sensitive materials
