PRO MZR™

WIRELESS REMOTE THERMOMETER & TIMER

BENEFITS

UP TO 200 FEET
WIRELESS RANGE

EASY TO READ
BACK-LIGHT DISPLAY

OVEN-SAFE PROBE
TRACKS TEMPERATURES
WHILE COOKING

Keep temperature measurements close at hand from anywhere in the kitchen with the Wireless Remote Thermometer & Timer from San Jamar.

A mobile display, a receiver and an oven/grill-safe probe helps increase mobility in the kitchen. Constant temperature readings are sent to the mobile display using radio waves. Unlike other wireless thermometers that use Bluetooth to communicate, radio provides the thermometer a strong signal with up to a 200 ft. range, regardless of what's in between. Obstacles such as walls and appliances obstruct Bluetooth connection and cut off communication between devices.

Eliminate the need for manual monitoring. Custom temperature alerts can be set, or the thermometer can also store preset target cooking temperature alerts for various degrees of doneness of beef, lamb, veal, hamburger, pork, turkey, chicken and fish. The back-light mobile display will alert chef's when their dish has been cooked to perfection.
