*Motor horsepower for our commercial blender motors was measured using a dynamometer, a machine laboratories routinely use to measure the mechanical power of motors. Our 3.5-horsepower (HP) motor reference reflects the horsepower rating of the motor itself and not the commercial blender's horsepower output to the blending vessel. The output horsepower to the blending vessel will be somewhat reduced.

***Three-year hassle-free replacement warranty applies to motor base. Jar assembly is covered by a one-year hassle-free replacement warranty. See UCG for details.
