

PORTABLE WASTE OIL DISPOSAL CADDY

# Model OC-90

BKI's extra-large capacity portable waste oil pick-up and disposal caddy tanks are constructed of tough stainless steel.

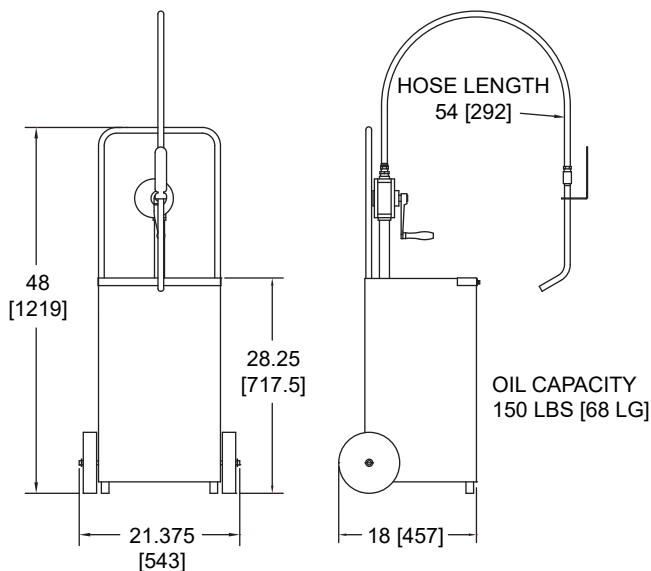

Standard features include a bi-directional vane pump for easy pickup and disposal of used oil. A fluoroelastomer pump shaft seal resists degradation from oil. A 54" long, high temperature hose with wand handle allows for pick-up of oil from the top of the vat, or directly from the fry pot.

## FEATURES AT A GLANCE

- Tank constructed of stainless steel
- OC-90 150 lb oil capacity
- Bidirectional vane pump allows for easy pickup and disposal
- Fluoroelastomer pump shaft seal resists degradation from pumping hot cooking oil
- Pump can transfer up to 150 lbs of oil in less than 2 minutes
- Removable tank cover permits easy cleaning of tank
- 54 inch, high temperature, long life hose
- Hose can handle up to 300° temperatures
- Wand allows pickup of oil from the top of the vat. This avoids breaching clogs of the pump as in competitor's units which are drained into from the bottom of the fry vat.
- Balanced transport position, eight inch wheels, and dual handles provide for ease in transport
