## **Correctional Utility Caddy**

## **General Specifications**

Correctional Utility Caddy to be Caddy Corporation model T-202-C.

Frame to be of  $1\frac{1}{4}$ " O.D. 16 gauge stainless steel tubing reinforced with 12 gauge stainless steel corner gussets. Unit to have two shelves. Shelves to be 12 gauge stainless steel with 1" raised edge on three sides and 1" turned down edge on the front. Shelves and gussets to be continuously welded at corners which eliminates unsanitary crevices. Both shelves to be reinforced with 12 gauge stainless steel channels. Unit to have a  $1\frac{1}{4}$ " O.D. 16 gauge stainless steel tubular handle at each end that wraps around the rear creating a back stop.

Casters to be 8" diameter heavy-duty, semi-pneumatic, modulus-type tread. Two to be swivel type and two to be rigid type. Swivel type casters to be provided with foot brakes.
