Bun Pan Racks -Heavy Duty

1330

1461

1331S

1461S

Virtually maintenance free, our racks are built for the long haul. All welded construction ensures the maximum strength and stability of each rack.

Angle guides are completely welded, vertically and horizontally, providing maximum strength and eliminating any cracks or crevices.

Ribbed angle guides allow pans to slide on and off with ease, minimizing the galling or flaking that can occur with heavy usage. (This feature also allows pans to slide on and off more easily than if a flat angle guide were used.)

- Available in end-loading or side-loading styles, with runner spacing ranging from 1½" to 6".
 - Accommodates full-size 18" x 26" and half-size 13" x 18" and 14" x 18" pans.
- All welded construction - Racks ship fully assembled and ready to use
- Supporting cross braces have gussets securely welded into place to prevent "racking".
- Equipped with four, 5" heavy duty plate type casters.
 - Non-marking wheels protect floors and minimize noise.
- Caster plates are securely welded to the frame of each unit.
 - Utilizing caster plates prevents any damage from bolting casters directly to the frame, adds strength and stability to the base of the rack, and makes it easier to (switch and/or) replace casters.
- Five-Year Guarantee against material defects and workmanship.
- Lifetime Guarantee against rust and corrosion.
- NSF Certified.
