

ALP473-48-BLK

48 Gallon

Mesh Outdoor Trash Can

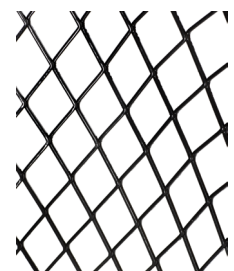

The Alpine 48 Gallon Mesh Outdoor Trash Can is a practical investment for parks, restaurants, office buildings, and so much more. It is constructed of stainless steel with a powder coating ensuring its rust resistance, stability, and ability to be outside all year long. Located on the trash can are vertical ribs that add reinforcement. The mesh material allows maintenance workers to see when it needs to be emptied, and with a weight of 28 lbs. it is manageable for anyone to maneuver. Each trash can's base has pre-drilled holes so that it can efficiently ventilate and drain moisture quickly. The Alpine Mesh Outdoor Trash Can comes fully assembled and can hold 48 gallons of waste, requiring less frequent attention.

Ideal for parks, walking trails, office buildings, schools, and more!
